</BLOCKQUOTE></BODY ></HTML>

-----=_NextPart_000_0032_01C5C2BD.8C0DA880--Just install an eds1000 and the paris
software and drivers and when I bring
up the program it comes up, all is well but when I try to use the eds inserts
or aux effects in the mixer window for compression, reverb, etc... the drop
down menu only has (no effect) or (external) to chose from, nothing else.
However in the native insert I get a listing for the vst plugins I have.

Have uninstalled the software and reinstalled and reseated the eds1000 card,
still the same thing.
Am I missing something or could the eds1000 card be bad?

Thanks for all the help this group has been over the years,
KeithIt's amazing how accurate it is about a Mac. the more I use Macs, the more I
can relate to this.

Here it is, BTW-

Another question is about asio driver. Is it working with Nuendo 2.2.0.39?
It's not working for me as it comes up with the message "Too many EDS
cards".
I work on XP Pro.

Thanx

with the DrumKAT, or the TrapKAT (maybe both)

BTW, if you're interested in one of the discontinued KickKAT controllers for
the DrumKat (the big one that Dennis Chambers uses in the TrapKAT video on
the website), let me know. It's much more realistic feeling that the newer
pedal version. I also have a DW 7000 pedal. Both will be going up on EBay in
a few days.

Regards,

Deej
