Just to be clear. The issue of simultaneous DBX I/O is only a concern if you are running the deck in real time as an effect. If you cut tracks directly to tape and later transfer the tracks to Paris this is a non-issue.

OK, I'll try re-doing some L/R tracks into stereo interleaved tracks & report back if I notice a difference in CPU usage.

NeillInterestingly enough, I was shooting a story on an older producer (Peter Dawkins), that was around in my days as a "music engineer", (24 tk Studers and the like), who had to stop in the mid 80's due to Parkinson taking hold. This guy was one of Australia's top, (if not THE top), music engineers of the time.

To make a long story short, he has come through the Parkinsons now, (ground breaking surgery), and is back producing..in the digital realm, (and enjoying it), but...he records the old way...multitracking guitars..octaves..all the type of stuff we all did back in the 80's, without the luxury of heaps of tracks and cut and paste.

He and Richard Lush , (Seargent Peppers and onwards at Abbey Road) along with Peters son (to show the

If this is true, you could make a 2 buss unit that was just sort of a stereo
record head.
Insert it at mixdown and hit it hard.

I am theorizing about the effect. I have not heard anyone claim what I suspect.

GeneOh, sorry, I thought it was included in the mic pre.

Didn;t know it was a seperate unit.

Gene,you can talk him into sending you one I'd bet.

This could be a way to push the inevitable end of product support into something
more kind for end users.

Something you need cracked? Tell the Copyright Office
8 October 2005 18:50 by Dela

The U.S. Copyright Office is conducting a periodic review of anti-cracking provisions set in the Digital Millennium Copyright Act (DMCA), and is seeking feedback from the public on what you would like to see cracked and why. If there is a genuine reason why you think something should be allowed to be cracked, the office might just allow it. Congress mandated that the register of Copyrights revisit the anti-circumvention section every three years to ensure that consumers have proper access to things they have purchased.

Last time around, the office allowed the bypassing of copy protection on computer games available only in obsolete formats, cracking ebooks copy protection so that blind people can use software to read it out, cracking of web filtering software to view the list of blocked sites and cracking computer programs protected by a "dongle" that is malfunctioning. The office will take written submissions through December 1st and will accept rebuttals until February 2nd 2006.

After this time has passed, beginning in April the office will hold two sets of hearings. Basically, if the copyright office can be convinced that something copy protected prevents fair use of the work, then it might allow the copy protection to be circumvented legally. "I suspect that we will hear shortly from people who feel they have not been able to use copyrighted materials because of the DMCA," said Ralph Oman, an intellectual property attorney and former register of copyrights.

Takei told The Associated Press on Thursday that his new onstage role as psychologist Martin Dysart in "Equus," helped inspire him to publicly discuss his sexuality. Takei described the character as a "very contained but turbulently frustrated man." The play opened Wednesday at the David Henry Hwang Theater in Los Angeles, the same day that Frontiers magazine featured a story on Takei's coming out. The current social and political climate also motivated Takei's disclosure, he said. "The world has changed from when I was a young teen feeling ashamed for being gay," he said. "The issue of gay marriage is now a pol

I think he was joking, it was a pun at Brandon's wording of "I will buy Dimitrios"

Meaning he will purchase you, Dimitrios, with cash money, not anything to do with wormhole..

Cheers,
