Wow.....beautiful!!.....now if we can just teach it to
kill.....<http://www.youtube.com/watch?v=W1czBcnX1Ww>

;o)Hey DeeJ,

I usually go with video or audio conversion to get an idea about audio centric
(i.e. FPU) performance. This is the current run down for mpeg -> DIVX conversion
from Tomshardware.

http://www23.tomshardware.com/cpu_2007.html?modelx=33&model1=946&model2=882&chart=430

Which is pretty effed up. The fastest processors can now apparently do this
in nearly twice real time. Damn, maybe I should buy a new 'puter.

As far as overclocking, just be sure your various cards will play nice. These
days I wonder if it's worth it, but it is always lots of fun, particularly
when things burn up. That sweet, sweet smell of burning

gain!

With a long history of innovation in recording technology, Intelligence Devices announced today that iPARIS X is now shipping for the iPhone.

"Ten years ago we foresaw that Microsoft Windows XP and MacOS 9 were both dead ends," said current company president Fred Betters, "so we've been working hard since then to catapult PARIS directly to the next great platform. The day has come to announce what we've been up to."

The new version of PARIS is slimmed down to match the iPhone. Thirty two tiny motorized faders are operated via eye movements. Sixty three balanced XLR connections fold out for easy access. "Our only

disappointment was that we couldn't quite fit sixty four XLR connections," said Betters, "but we added 807 digital inputs via Bluetooth, along with one very high quality output."

Although the system is monophonic "no one can really hear the difference," said head of engineering Ron Fellows. "We had to make a few compromises to work within the limitations of the iPhone's form factor and speed. Going monophonic was a no-brainer."

iPARIS X even includes a built-in fold-out coffee machine to extend late night inspiration. "We found room for the important features," noted marketing director April Springers.

iPARIS X is available now for an introductory price of only \$4,200 (upgrades from current PARIS systems will be just \$4,199, plus shipping). Future expansion plans include a pop-up dome-shaped cup holder module that can simultaneously accommodate coffee, beer and Thai Tea. The "iPARIS X iCUPOLA" is only \$900, and the first 100 buyers will receive an iCUPOLA for free.
