Kim,
I like both Neil and Michael's suggestions. Fenders
have a cleaner sound which is often good to help
retain the keyboards clarity. I know with the Vox ToneLab
and with Nigel I usually end up with the matching cabs
to the given amp. I try them all and almost always go
with what was sold with the head. They are matched.

I used to have a Vox AC-30 and a Marshall 4 x 12... ehheh.
A Dual Showman through the same Marshall... ewwww.
Put those amps with their soul mate cabs and wow!
The old 100 Marshall sounded sweet with the cab though.

Use your ears. Boogie gets a great clean sound almost=20

like a Fender but rounder. Might be another option to try.
Tom

"michael bliss" <mbliss1@austin.rr.com> wrote in message =
news:434bec45\$1@linux...

Neil has some great suggestions already.
The Fender Twin was the amp used with the rhodes, thus
also sounds good on the Wurli. Also, try the Vox AC30 on the Wurli.

As far as B3's go, as Neil said, go with the Bassman or some=20
big ol' bass cabinet such as the ampeg.=20
Let us know what you end up using, and what sounded best.

michael bliss

Rod,

Thanks for that. Does it actually separate the interleaved files?

Rod,

Really? I thought I had a problem with that once...

Maybe not. I can probably do this now then.

Thanks!

Tom
