After trying multiple combinations of David and DJ's ideas  
I am still unable to see more than the Master hardware device  
be it 442 or a MEC. =20

There is a problem with using Card D as the master card.  
It's mixer doesn't allow a Control Room out. That's a no go=20  
for me.

Any other ideas that you can think of ? I wonder if there is any  
chance the 4 MEC setup will work if this is so flakey with my gear?

Thanks for any new ideas you have.
