(859) 635-5762 Perfect Di, also to make things a bit easier/faster, you can record a 4 minute track of silence, then drag (time looked) the entire chopped-up track over this one and all crossfades and patch-ups get done in one shot. You may need to tweak a few crossfades in some places thow.

by the laptop sound card) where
will I get my midi sounds from if the laptop sound card is not in use? I am trying to get an understanding of the midi sound of the audio routing. I do have a Edirol DX plugin with midi sounds in my Sonar HomeStudio application that I use and I think this is via software not the sound card so it should still be available.

I'm thinking that moving towards the USB interface will decrease both my problems (latency and noise floor) considerably and at \$149 it seems a pretty decent deal.

The only other item I'd like to understand is that the only time I need the ASIO or WDM is during a Sonar session of playback or recording so if I make the ASIO/WDM driver change to only the Sonar program then the rest of my laptop functions and sounds will continue to use the sound card and MME driver. If I am just playing wave files or mp3 files out of the Windows Media Player, it will use my laptop sound card as normal and as MME, correct? and I don't need to change anything, right?

Anyone have any insight, are users of any of the above referenced items, have recommendations and or comments.

Thanks for any and all the help you can reply with,
Wayne I'm thinking of spending a little bit more and getting the RAID 0 setup. This box will likely be doing a bit of video editing as well.

I'll probably get a PCIe card for one of my Magma's and either try that with my Magma holding the RME cards and interface the other Magma with the UAD-1 cards in one of the PCI slots, or I'll just yank the MAD1 and AES32 out of the Magma, load them in the 2 x PCI slots on the MOBO and then try interfacing the other Magma with the DSP processors in one of the PCIe slots. You got a mobo that you think would handle this? Are you guys OC'ing these quads to 3GHZ?

And yes, most of those are similes, but who's counting? :)

This stuff reminded me of a little book called "Non Campus Mentis," a condensed history of western civilization compiled from the papers and essay tests of college student. Scary, but hilarious.

Rich, you're still doing a great job of ignoring most of the evidence and grasping for whatever you can use to rationalize your existing position. Which is, if I read your message correctly, that raising the price you pay for gas is an infringement on your liberties.

Better take that up with Exxon who are losing money hand over fist in a desperate attempt to keep your gas price affordable. ;^)

I'm sure you're quite right to believe that all the scientists you ignore are way too dumb to know anything about "natural warming and cooling cycles." Good thing you're around to correct the experts on their ignorant oversights. LOL! Good on ya. Heh. BTW:

<http://www.realclimate.org/index.php/archives/2008/02/antarctica-is-cold/#more-529>

I'd be happy to more completely celebrate your non-objective, political paranoiac knee-jerk reactionism and scientific scapegoatism, which I love, but A) this is the PARIS group not the General group, B) I like boats, too, and C) I just got a new bass and it needs to be played...

Cheers,
-Jamie
www.JamieKrutz.com

PS. Woo, new bass (OK it's used - reuse and recycle)!

When I went to look at this bass today I knew that if I didn't get it I

would die! ;^)

It's a Warwick, their import line, but nice. It has that Warwick growl.

Not getting rid of the Fender Jazz Special, mind you. But I've been

wanting a 5 string for a while.

Cheers,

-Jamie

Very cool. Are you playing bass at your live gigs too these days or are you still in rock star shredder mode?

;o)Mr. Simplicity wrote:

> still in rock star shredder mode?

Right now the basses are for recording - new CD in progress (s l o w l y progressing).

At gigs I'm still shredding on guitar and violin. The new fusion/prog band has me doing Dixie Dregs, Jeff Beck and UK/Holdsworth covers, plus originals that are even more shredderific. Definitely giving me a workout! Some of the tunes are mine, so I share the blame. :^)

By contrast I have a solo singer/songwriter concert coming up at Swallow Hill in April - mostly acoustic guitar and piano, maybe a little violin, maybe some other stuff. Come on up!

Cheers,
-Jamie

www.JamieKrutz.comHey, it was snowing pretty hard when I drove home from work last night . .

Back in 1971 I went on an acid binge and when the paranoid phase of it kicked in, I was watching TV and Walter Cronkite was talking about nuclear testing and I decided that the free protons and other stuff that was caused by splitting atoms was going to affect other atoms and cause them to mutate and that eventually this would start affecting DNA molecules all over the earth, even with people who were thousands of miles away because it would be like a domino theory so as the paranoia grew, it became obvious that not only were we doing this here, but that our solar system was actually just an atom in a much larger molecule and that if we were doing this here, then it was probably happening in a parallel universe too and that it was just a matter of time before our sun which is nothing more than the nucleus of an atom was either going to split wide open because it was probably part of a

uranium molecule. At that point I really got paranoid and it was nighttime so I went outside and started staring at the stars and suddenly I saw this big shooting star and I knew that thi

>I've been spec'ing out processors. It's been a while since I've done
anything like this but I got curious. there are some monster performers out
there by Intel now.....truly supercomputer stuff and price tags of
\$1800.00 per CPU, but it seems like the Intel Q6600 which costs around

\$250.00 and can be clocked to in excess of 3.5GHz per core, is an incredible CPU for audio because the mainboards have chipsets compatible to most audio/DSP hardware. AMD seems to have recently come out with a CPU called a 9850 that is a quad core that is about the same price as the Intel Q6600 and performs at roughly the same level.

It's a whole 'nuther world out there since I built my last DAW.

If I can get Chris to build me a DAW that can run my UAD-1 cards and my RME hardware and I work at 1.5ms latency while tracking (which I can do now on my current Opteron 185, though once the track counts get higher, it starts to ping the CPU meter in Cubase so I have to go to 128k buffers.

I just want something that can sorta' loaf along at low latency like Paris. I'm not too worried about using UAD-1 plugins while tracking anyway. It's looking like a Q6600 on the right mobo might do just that. Micro Center has the Q6600 on sale for \$199.00, I don't know if that is a good price or not.

As mentioned, I left *owning* PARIS years back (and as mentioned am coming back). But I never left *using* it - I've been "house bassist" for many years for a tiny PARIS-based studio with a couple of JUNO nominations and a couple of decent-size acts behind it (Sweatshop Union and a remix for REM), and they always let me pretty much run my own sessions and edit my own tracks, so my rudimentary PARIS basics are fairly current.

However, it's on a Mac (as was my own rig) which ruled out a ton of developments, so I can't wait to get PARIS installed on a PC rig to explore more options, including your full range of plug-ins.

Shoot me your email privately if you have a sec.

It's terrible resolution, but here's a funny pic of The Band in '64 when =
they were Levon and the Hawks.

reinstalling the application may fix this problem.

i tried adding the line that bill had said to and there was no change.
by the way all the other stock fx run fine.

Interesting...

The earth's climate has been in a constant state of change for the last
oh....4 billion years or so and somehow we've come along in the
last 50 years and managed to screw it all to hell..

Uh...yea sure.

dbYes, Sarah, it is actually caused by extraterrestrials, but, they don't
want to eat us (luckily we don't taste like chicken). They just like to
see us argue. They're really sick that way...

Say four and a half, although for most of that time you wouldn't have wanted to be here. You couldn't have survived.

However, for the time humans have been here, the climate has been remarkably stable compared to those earlier times.

This is partly because of the greenhouse gases that have helped keep the planet at an average temperature that's conducive to our kind of life. Which is probably something we should pay attention to and try not to mess up.

and somehow we've come along in the
> last 50 years and managed to screw it all to hell..

Somehow? You should look into how. The science is out there but you have to get past the political smoke screens.

Warning, it requires learning a little bit about atmospheric chemistry. Some find that "boring." It's really cool, though.

It's actually a commercially available song called "Rouler sa bosse", off of Bruce Cockburn's instrumental album titled "Speechless". I tried locating a source to actually buy the sheet music, but have not had any luck. So since this is not intended for any commercial usage (just for personal use for playing as a duet), I figured transcribing would be the easiest. I imagine the song can be heard on amazon.com, or perhaps on Bruce Cockburn's web page. But I could also extract to MP3, I'd just need to figure out where to "host" it...That's really cool, Mark! Thanks for the link.

Cheers,

-Jamie

>Anybody else seen this prob with 3.0 on Windows XP? When doing a bounce to disk, I get the dialog box asking for filename, but meanwhile the bounce has already started and the tracks are playing.

I'd swear that it just started doing this, and for some reason, it seems that the first time you do a bounce in a project it waits for the name before beginning the bounce. As it is now, I just have to leave enough 'roll time' ahead of the tracks to give me time to type in a filename. Not an ideal solution...

Any ideas?Hi Bill,

That's a new one. I just tried my system. Using the bounce to disc button on the master mixer (12.) I started and stop'd mixdowns 3 times. Twice using the C16 record/play buttons and once with the mouse on the on screen transport (4.). Each time the system prompted me with "mixdown" and waited until I clicked save or OK (I forget). Worked fine each time.

So, I'm no help.

I'm ready for a new sweeter Paris verb Mike. Can't wait !

Tom

"Mike Audet" <mike@..> wrote in message news:47efc24d\$1@linux...

Hi All,

I just thought I'd let you know that I got one of the two hall =
algorithms
working this morning. I forgot to implement a rather important =
control,
but I don't expect it will be difficult to finish. I also have to =
make the
interface layout work a bit better.

I'm not sure if this is a simple esp2 port of the DP/4 Hall algo, or =
if it

is an updated version of it. But, it sounds incredibly smooth, full, =
and
wide. Just listening to the outputs is awesome. It sounds beautiful =
all
by itself. To my ears, it is an improvement over the dp/4 hall, but =
that
may be because of its 24 bit input and output, or because all the =
analog
circuitry is bypassed.

Anyway, it's coming soon, and it rocks!!!!

All the best,

Mike

I should have it done by next Monday. If I wasn't so swamped with school
work, I'd have it done already.

There's another hall algo to do after this one, which will be my next task
after this.

Cheers!

Mike

>How to use your rebate

As you may have heard the Bush Administration said each and every one of us would now get a nice rebate. If we spend that money at Wal-Mart, all the money will go to China . If we spend it on gasoline it will all go to the Arabs. If we purchase a computer it will all go to India . If we purchase fruit and vegetables it will all go to Mexico , Honduras , and Guatamala. If we purchase a good car it will all go to Japan . If we purchase useless crap it will all go to Taiwan , and none of it will help the American economy.

We need to keep that money here in America , so the only way to keep that money here at home is to buy prostitutes and beer, since those are the only businesses still in the US .i'll try again after my mri this morning. and just to be sure i'll post the previous line with the added line. i guess i don't get if the originals show up with the system32\ensoniq\plugins path yours don't.

>>Hi Mike!

Forgive me for jumping in here... i have not been around here in a few years
since i stopped using paris.

Congrats on your work pulling the new plugins together... i was so pumped
when Chuck started working on the first lot of skunkworks stuff, especially
No Limit.

I'm tempted at some stage to put a couple of cards back in a rig seeing as
i still have some paris remnants... Not sure what other code you have but

2 plugins that i think Paris would do *SO* well would be:

- 1) Tape Emulator (!!)
- 2) Transient Designer (ala SPL's hardware TD or Sonnox Trans Mod)

Not sure if it's even possible, but i would definitely fire up my MEC's again for those babies!

Also, what about the Leslie emulator from the DP4?

Good luck with it all... great to see people are still loving the sound of Paris.

Henry.Hi manic,

The Leslie is a possibility, but the others are unlikely. I bought a book on DSP programming which has some ideas, but we'd need an algorithm for a tape emulator or transient designer, and I'm betting that creating a good one would be tough.

If there was anything in the DP/Pro that you would particularly want, that is very possible.

All the best,

Mike

I can't be sure, but I think someone hard coded "system\ensoniq\plugins" into the code that loads additional plugins. I'm actually a bit curious if copying the entire Ensoniq folder into the system folder would solve this problem just as well as the path statement.

Or, it could have nothing to do with that. But, the path trick works.

Good luck!

Doesn't this thread belong on the prostitution newsgroup?

<http://www.faqs.org/faqs/by-newsgroup/alt/alt.sex.prostituti on.html>

;o)Zone alarm is pretty invasive both at a resource level and a user level. Not
a fan at all, save for troubleshooting situations.

I discourage people from turning off XP access to MSoft websites, as that's the way you'll find out about security patches which, as I'm sure you know, is an issue on XP. But hey, it's your trip, you can use Zone Alarm as Aaron mentions.

TCB

"James McCloskey" <excelsm@hotmail.com> wrote:

Hey all we need to do is over clock the QX9450 (2.66mhz) to 3.2 and save \$1200.00

The Q6600 when first released was \$1000.

That's what I do with audio machines. If you net surf with it, you probably
don't want to unplug it. Zone Alarm will plug it to whatever degrees you
tell it to.

/>

plugin.
For instance.

A. You put a=20
=3D

waves

=3D3D

=
renvox=3D3D20

=20

 on track 1 on slot two either standalone or =
from
withing=20
the =3D

FFX4 =3D3D

or=3D3D20

=
=20
chainer...
Now the actual latency this plugin introduces is=20
=3D

64=3D3D20

 samples.
That =
MEANS that=20
all other Paris audio tracks are 64 =3D3D

 samples=20
ahead=3D3D20

 of track
1 or if you =
like ,track=20
1 is 64 sample latent.
NOW =3D

=3D3D

=
having=20
in=3D3D20

 mind that you have put Faderworks =
on every=20
track then BY =3D3D

 JUST
pushing=20
the=3D3D20

 ON button track 1 of the Waves =
renvox preset=20
then =3D

Faderworks
DELAYS
=
=3D3D

=20

all=3D3D20

 other Paris audio tracks by 64 =
samples=20
LEAVING intact the =3D3D

 audio
track 1=20
for=3D3D20

 which faderworks ignores the=20
latency.
OVERALL latency is =
=3D

displayed
=20
=3D3D

 on every=3D3D20

 track =
too=20
!!
It even substract latency !!!!
So by putting a=20
=3D

=3D3D

 waves=3D3D20

=
rencomp (64=20
samples) on track 2 that does NOT mean
that=20
=3D

faderworks
=3D3D

=20

will=3D3D20

 delay all others again by 64 =
samples !=20
, thus overall
latency =3D

WILL
=
=3D3D

=20

REMAIN=3D3D20

 at 64 samples, ONLY track 2 =
which was=20
already 64 samples
latent
=3D

=3D3D

=
because=20
of=3D3D20

 track 1 now faderworks just =

64 samples
for this=3D
=3D3D
 =20
&tack=3D3D20
 !!
&t;Anyo =

I'm in for the automatic version too at \$50.

I've owned the existing one since you first mentioned it.
I may donate for the update too once I see how it works
for me.

Tom B.

"Dimitrios" <musurgio@otenet.gr> wrote in message =
news:480fa5ac\$1@linux...

Hi,

I would like to start a post here where everyone that will sign this =
will

commit to buy-pay a 50\$ (I cam up with that price) fee for the =
completion

and release of this super plugin.

Imagine a Faderworks type of plugin where all vst (well almost all...) =
will

be automatically recognised and so the latency compensation will be =
done

automatically.

If that graps any interest from any Paris users please reply with your =
name

signing and committed to pay-buy this plugin.

If enough Paris users will sign then maybe the Faderworks author might =
work

this out.

Regards,

Dimitrios

1. Dimitrios Bitzenis

I choose Polesoft Lockspam to fight spam, and you?

Here's some info I dragged out of my archives regarding Paris nudge values.
I don't know if it will help, but it might if the programmer needs info
on how Paris "sees" things.....

The nudge values are not consistent with what one would expect the samples
to be per ms and they are also not consistent with themselves. Meaning that
a 1ms nudge would be expected to be 44 samples but is actually 80. A 10ms
nudge isn't 10 X 80 or 800 samples though, it's actually 480.

Here they are if anyone is interested:

1ms= 80 samples
5ms= 240 samples
10ms= 480 samples

25ms= 1120 samples
50ms= 2240 samples
75ms= 3360 samples
100ms= 4480 samples

also, using sampleslide to assist the nudge function....for UAD-1 plugins,
the Sampleslide presets were as follows:

1 Plugin 1536 (slide 4 x 100ms in Editor)
1 Pultec 1523 (slide 4 x 100ms in Editor)
2 Plugins 3072 (slide 8 x 100ms in Editor)
2 Pultecs 3046 (slide 8 x 100ms in Editor)
1 Plugin 1 Pultec 3059 (slide 8 x 100ms in Editor)
2 Plugins 1 Pultec 4595 (slide 12 x 100ms in Editor)
2 Pultecs 1 Plugin 4582 (slide 12 x 100ms in Editor)
3 Plugins 4608 (slide 12 x 100ms in Editor)
3 Pultecs 4569 (slide 12 x 100ms in Editor)

I think I put this together back when UAD-1 latency was twice what it is
now.

Well anyway....FWIW

deep, with 15 ms latency,
but lovely nonetheless.
Incidentally a friend brought round his prized single channel
Avalon preamp for a session, dunno the model, but it looks funky),
and we both agreed there was no perceivable
difference between it and one of the strips
on my Soundcraft Vienna MK1.
Don't get me wrong, I love good gear,
and all those bakelite knobs look really cool, but I'd rather pay off my
house first.

Flame away!
