-----= NextPart_000_0143_01C8173D.D2F47860--And you know how most of it is 9.2 on the

cringe-o-matic scale?

Yeah.. But but but...

Damn, a couple were really good.

One sound like a cross between ZZ Top and the Who and still

sounds really fresh for a 20 year old tune...
No lyrics on that one yet. I MUST finish this..

The other one has a cool melody and 9.8 on the Cringe-O-Meter
for the lyrics... So out go the words.

Another one is a blues but with a Floyd feel and a bit of
Jean-Michel Jarre in there. (did anyone else love Oxygene?)

Hey, I got work to do here...

it's so damn weird listening to my younger self... soooo weird..

Stinkin' guy could play guitar, but oh sweet Lord the lyrics...
ouch ouch ouch

But no one will ever hear them... muuhahahahah!

DCEver dig out, not EVERY dig out...

Sheesh

There is audio on all three cards now too.
I rewired so maybe that was it. It never said
cards are not connected properly like it usually does.

Still wrong:
windows errors at start up, windows error at close. No BSOD. Windows =
still good.
Mod Pack and new EQs not there even after installation.
Presets not there for original Paris effects.
Default Project makes it crash instantly. That's weird.

Runs great without using a default project though. Pretty quick =
actually.
Comments?

David, Chris and Aaron,
So far tonight I found out why Paris configs were not being saved.
I was told to remove the Paris Backup file for testing.
That's the config. . . Once it was back all C-16s worked fine and =
retained
their C-16 classic mode.

The stockFx.dll IS in the system 32 folder but doesn't seem to be =
found
at Paris start up for some reason. That being said all the stock =
effects
are present although no presets for them. mod3a.dll IS Chucks =
ModPack.
It is also present in System 32 folder but Windows says it's an =

unrecognized
file or something like that.

I tried saving a Default Project. Paris crashed at boot up using it =
and took Windows with it.
After removing it it worked fine.

The system seems sparky. Not loaded down with tons of effects yet =
that's for sure.

Anyone care to chime in on what I should do about the Paris start up =
errors?

Next I am making sure I get audio on all three cards and confirm Paris =
plugs are working properly.

My chainsaw has been bogging down after it's been running for 15 =
minutes. Any idea about that?

are present although no presets for them. mod3a.dll IS Chucks =
ModPack.

It is also present in System 32 folder but Windows says it's an =
unrecognized
file or something like that.

I tried saving a Default Project. Paris crashed at boot up using it =
and took Windows with it.

After removing it it worked fine.

The system seems sparky. Not loaded down with tons of effects yet =
that's for sure.

Anyone care to chime in on what I should do about the Paris start up =
errors?

Next I am making sure I get audio on all three cards and confirm =
Paris plugs are working properly.

My chainsaw has been bogging down after it's been running for 15 =
minutes. Any idea about that?

Tom

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:47213576@linux...

Aaron,

That's where I was yesterday just before I installed=20

Chucks plugs and a few VSTs that are wrapped.

The stock fx are working but not all of Chucks.

The presets weren't there for the stock ones either.

Tom

"Aaron Allen" <know-spam@not_here.dude> wrote in message =
news:47213008@linux...

do a flat, no frills install man. no FX other than the stock =
ones. StockFx.dll is what comes with. mod3a.dll I 'think' is a chuck =

plug, but I could be wrong about that one. Stock, bone dead stock = install and see what happens. Also, I've noted over the years when = installing/uninstalling paris you need to boot/reboot cold to get it = happy between 'any' install/removal process. completely and absolutely = uninstall. Reboot. Delete anything left behind. Reboot. Install. Reboot. = Does it work at this point in the game?

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message = news:4720dc45@linux...

ork at this point in the game?

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message = news:4720dc45@linux...

Aaron,

I should have mentioned this started happening after I installed = the

newer (but not Mikes yet) Paris effects. The FreQ or modulation = bundle=20

don't show up either. They're probably one of the problem here.

Tom

"Tom Bruhl" <arpeggio@comcast.net> wrote in message = news:4720b46a@linux...

Hey Aaron,

This is a clean install or so I thought. Should I try to = replace the files

it's looking for or do I need to do a complete reinstall? No = Pace.

Today's the day.

Tom

"Aaron Allen" <know-spam@not_here.dude> wrote in message = news:4720412a@linux...

This sounds like you have a bad/corrupt set of files to me. = Did you try another installer?

Also, if you still have 2.1 or 2.2, have you tried that as = well?

If you pulled this from an image (ghost, acronis, PING, = etc...) I'd bet on a bad image. If not, I'd bet on bad installer. Either = way, I think you're fooling with corrupted files.

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message = news:47203fcd@linux...

Hey everyone,

I am functional but barely right now. One 442 with no = SPDIF is no bargain...

Major problems with newest install and computer:

At Paris start up it says: StockFx.dll not found twice.

It also says: mod3a.dll in system32 folder not a valid = Windows image.

I think I should just remove the mod3a.dll from the = system32 folder right?

StockFx.dll should have been part of the Paris install = right? Where

can I find it and where does it go? Paris Pro folder?

Paris also works smoothly except two of the three C-16s = won't work entirely right.

I tried to get them all working in classic mode but the = configuration is never saved.

It remains C-16 1 is Classic and 2 & 3 are Pro mode.

I saved the project before resarting though. Hmmm? = Everything else seems to save ok.

The audio on card B never works. I have to assign Submix = 2 to Card C. I've tried two cards

with the same results. I'll try another. Paris closes = fine but a Windows error comes up and=20

asks if I want to send it to their sorry asses everytime. = No BSOD though.

Lots of nutty stuff here but at least it kinda works.

Any tips would be great at this time. I have two days to = get in tip top shape for real work. I wish I knew more.

Thanks for all the help you guys.

Tom

Than=
ks,=20

man! I'm feeling pretty good about it right now, based
on the =
outcome -=20

which was completely different than how I was
feeling about it =
before,=20

which was of course based on what the
initial prognosis was & =
where=20

they thought they'd have to "dig
into", as it were.

Only =
weird thing=20

so far has been when I took the bandage off
tonite, the entire area =
of=20

flesh around the "work" area was
completely snow-white... like no=20
blood-circulation kinda
white. Appliance-white. No shit. So, I =
called the=20

doc & he said
he wants me to come in tomorrow morning so he can =
look at=20

it,
but I think actually figured it out... I think it's due to=20

the
epinephrine that they used to stem the bleeding - they had =

to
shoot=20

me up with it (mixed with a lidocaine local for the pain)
in that =
area each=20

time they went back in, so there's got to be some carryover effect = 20

that much of it, I would think...
because it's only white in the =
areas that=20

they shot up with it.

Sarah? Comments from a medical pro's=20
perspective?

-----=_NextPart_000_0055_01C817E6.C430D270--Thanks for this X-over crossover eq !!
Really nice.

Can help make a snare and kick sound quickly good !

Can you please implement this on every other plugin ??

Thus we are saving the 16 effects limit per card.

So the compressor could have this before as noLimit and Gate...

Thanks again !

I already contributed for this too so I would love to see others support you too in the big things you are doing for us !!!

Regards,

Dimitrios just finished the install!

cant wait to have a free moment now to start seeing the differences.
