un! I train =
and race Thoroughbreds in OK/TX/AR area. =20

Anyway, to try and stay OT, thanks again for the information and I do =
have the 68 pin SCSI cable. (The only cable I got with Paris was a =
clock cable, and I also got one diskette - Wavelab Lite). Edna =20

For what it's worth, I remember I.D. saying years ago that the three solo
limit was a function of the way the busses were allocated in the hardware,
or something to that effect. No one thought it was a good idea, it was just
a physical limitation of the technology. I know it's hard, but we all have
to try and remember that the PARIS technology is the better part of ten

I would like to have them.

Jameynumber 3 IS DEFINETLY THE WINNER!!! that's a great idea, thank you very much,
i can set that up on my template and i'll be slap happy all night long...yipeee

that gets the "why didn't i think of that" award

thank you

I believe you didn't know that :)
Ok, here we are
You just go to the mixer you wanna copy from and select copy all channel
settings (you knew that right ?)
Then go on mixer 2 or 3 or hwatever and close first the native and eds slots
as to not show.
Now select past all channel settings, now click on native and "show settings"
and voila
I don't believe that noone has ever came across that before.
The only drawback though is that it doesn't remeber the parameters , but
hey what do you wan
