>Hi Tom,

If you've only got one card in, then the Mastercard = 0 setting is right.
The file is Paris.cfg, and it lives in the c:\program files\Emu\PARIS PRO
folder.

I'd still check it out to see what it is set to.

If it is wrong, what you are describing will happen.

Good luck!

Mike

-----=_NextPart_000_012D_01C813D0.82656EB0--Thanks for the info. It does put somewhat of a
 damper on my plans based on
 the clock issues with MADI, but it sounds very powerful.
 Are you sure that running the RME ADI 8-DD format/sample rate converters
 I/O to the effects sounds better than running analog? I would like your opinion.

Cool setup.

>Hi Tom,

Are you using a default project with PARIS? I'm so sorry of this has been asked and answered already. If so, perhaps it is telling card zero to lock to an external clock, which it can't because there isn't one.

It would be interesting to attach an external clock source to the MEC and then start PARIS to see how it behaves. Or, if the clock generator is fried, tell paris to lock externally and see what happens when an external clock source is applied.

Isn't there a master house synch switch in the cfg file? I've never used it. Maybe DJ could help with what that should/shouldn't be set to.

Wish I could do more than think out loud...
