-----=_NextPart_000_0027_01C66876.0699CC10--I think it's performing an "undo". Did you move that track before you mixed.

I've never had it alter the timing on tracks after alt backspace, but I have had it perform an undo at the same time. Work around: don't alt backspace mixes, just name a new mix and delete the old later in windows.
