>Kim, I know you mentioned building something, but if you decide to go the  
prefab route, the Mackie series is pretty good. Outside of the touring I  
do playing big rooms, I do quite a few private events with a number of different  
bands. In large part, the Mackie powered series seems to be the choice of  
weapon. I'm not sure if this is simply cost related (probably), but they  
sound pretty good.

Usually, they run as many as six vocal mic's keys, horns, kick and snare. I  
think they hold up fairly well. I've seen them used in rooms that cover up  
to about 200 people. In all honesty, I don't recall the model (they are quite  
varied in the line), though I did a gig this past weekend and actually asked  
because I was impressed. Never had the good fortune to try the DP's, would  
love to hear them. Best of luck!

Tyrone
