we're wanting to keep moving on this.

Probably a dumb question, but have you tried prying out the card
connectors a tad? It might be that you just crushed or
collapsed them a bit.

Do they come with a fire extinguisher? If so, sure - grab one.

:D Tom, check the "For sale" section of the NG, since someone JUST
posted a bunch'o' Paris gear for sale, including MEC's - if
that doesn't work out for you I have ONE I can lend you, not
for sale, but can lend it to

you for a short time if you're
willing to pay for shipping both ways. Post here to lemme know
if you need that for a favor; at which point we can negotiate
for your firstborn or something lol!

Aaron,
Thanks, I won't know about the modules until some new Mecs get delivered =
here.
I think I have the four I need almost on their way from multiple =
sources.

It looks like a chip in the master section of the scsi scorched mec got =
hit bad. We're
looking for the chip now. The other mecs may have less of a problem. =
Maybe some DC=20
down the WC line? Just a guess. Everything was AC grounded and no =
polarity shift.

We learned there's all kinds of protection fuses in line on the master =
section. It seems 'they' weren't
fried but the expensive stuff right after them was. . .
Tom

"Aaron Allen" <know-spam@not_here.dude> wrote in message =
news:46f9cf56@linux...

I'll also toss out an edumacated guess that only the interface portion =
got fried and all your MEC cards are likely to be ok... holla back on =
that man.=20

Sorry, no spare MEC's around here, in fact I'm going to be growing my =
rig again shortly with a few more EDS cards :)

Say Tom, have you called The Soniq about repairing yours... he offers =
warranty on his work yano :)

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:46f9621b@linux...

Most absolutely hardware. 3 Mecs down for the count.

No word on the 10 modules that were onboard during
the mishap.

That's cool, who made them?

I really like that the LED lights don't need dimmer packs, which means less stuff to carry and hook up. It'd be handy to have lights that could accept MIDI directly. They could still use an XLR connector. Switchable between MIDI and DMX would be great.

Cheers,
-Jamie

I had a SCSI that did that.. worked w/442, but wouldn't with a MEC. I =
think you probably hit it right on the head.=20

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:46fb4262@linux...

AA,

I did find one scsi cable that had a couple dead pins out of five =

cables.

It allowed the 442 to work though. ? . Maybe those pins aren't used in the Paris pin out? I chucked it anyway. Could be the source = of all evil.
Tom

"Tom Bruhl" <arpeggio@comcast.net> wrote in message = news:46fa1183@linux...

Aaron,
Thanks, I won't know about the modules until some new Mecs get = delivered here.
I think I have the four I need almost on their way from multiple = sources.

It looks like a chip in the master section of the scsi scorched mec = got hit bad. We're looking for the chip now. The other mecs may have less of a = problem. Maybe some DC=20 down the WC line? Just a guess. Everything was AC grounded and no = polarity shift.

We learned there's all kinds of protection fuses in line on the = master section. It seems 'they' weren't fried but the expensive stuff right after them was. . .
Tom

"Aaron Allen" <know-spam@not_here.dude> wrote in message = news:46f9cf56@linux...

I'll also toss out an edumacated guess that only the interface = portion got fried and all your MEC cards are likely to be ok... holla = back on that man.=20

Sorry, no spare MEC's around here, in fact I'm going to be growing = my rig again shortly with a few more EDS cards :)

Say Tom, have you called The Soniq about repairing yours... he = offers warranty on his work yano :)

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message = news:46f9621b@linux...

Most absolutely hardware. 3 Mecs down for the count.
No word on the 10 modules that were onboard during
the mishap.

Anyone have a spare mec they can part with?
Assamundo

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:46f4fa9a@linux...
I'll double check Aaron.

Continuity is my middle name.

"Aaron Allen" <know-spam@not_here.dude> wrote in message =
news:46f4e6c0@linux...

Dude, if you have 3 toasted MEC's I think it VERY likely you =
had a bad cable that put the hurt on them all as you swapped around =
parts.=20

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:46f472e2@linux...

Intersted people,

I know 3 fried mecs is unlikely. It's not confirmed until =
Tuesday=20

when I'll check the two that might 'still work'. The =
hardware solution
is seeming to be the most logic
