<BODY>

Hey, =
thanks AA –

The VirtuaVia’s PSU is causing deal-breaking problems, and those need=
to be eliminated first before anything else can be determined. Here’s=
a very interesting thread from the UAD forums, looks like someone else was =
thinking the same thing as me –

<FONT

A few months ago I bought a Virtua Via PCIe to PCI expansion chassis for my new MacPro 8x3GHz to run my PCI UAD cards.

The reason why the VV box doesn't work properly with more than one UAD cards is because of a weak powersupply. The included external PSU delivers 12V/3A and unfortunately the maximum rating of the internal (on the card) 5V step-down switching regulator (2596) is also limited to 3A. So using a higher power rating 1
