I'm using Me on an old 133 PIII and I'm thinking of upgrading to xp.

I get memory errors -- i though of just upgrading hard drives but i read
paris runs faster under xp....

It there an audio problem with xp?

thanks

charles

>Just curious...

For people who've switched from Paris, did you switch for features or sound or both or what?

Every so often, I think about switching, and since I'm gearing up for some new recording, I'm wondering if now's the time (although, sticking with Paris might be the easiest thing, and my main goal is to improve my room and tracking and those sorts of things first).

But I wonder if I'd be stupid to not get with all the advances. ADC would be nice, midi would be nice, etc. And maybe low end converters have come a long way, etc.

I heard some stuff done on a Digi 002, and I was knocked out. You can get a complete Digi 002 system with control surface and a bunch of software for about \$2000 which is cheaper than Paris was (I got Paris mainly because it was a complete system like Pro Tools, but way cheaper).

Sorry for the long post. Thanks for any feedback. I just listened to it while on a day trip down into New Mexico. This is some very good stuff Macle. Among other topics, I think you guys have written the first song I've ever heard with the topic being about a menstrual period.....and you did it very well. Damn!!! I couldn't believe it. ;o)

I think It's All About You has the makings of being a serious hit song, but I also think some of the others do too, especially I Want Some of What You're On. You guys have some great hooks, both musical and lyric and you get to them quick and nail the listener.....and then the song stays in the listener's head.. I listened to the CD straight through 3 times and didn't hear anything that bored me or that I disliked. /that's the test for me and IMHO, there aren't any filler/throwaway songs on it.

Nice Stuff.

;o)

It's weird, but even though I posted most of these up and got lots of great feedback a while ago, finally putting out this CD, I've got that same sort of nervous feeling you get when you sort of stick your neck out there. "It's crap, they hate it!" floats around in my head. Plus the worry that it's old news (although not to most of the world out there).

Thanks again. As I keep saying, this board is the best!

most plugins. I do try to mix in DP from time to time, but I just can't get things to sound as good as mixing in PARIS. This is probably my lack of skill, but I really do find my mixes in DP sound "cramped" and "one-dimensional" especially with a high track count. I'm sure people can get great mixes with any decent software though. It comes down to skill I think. PARIS just seems to be very forgiving to my level of mixing sucktitude. My two cents.

>Hi John,

From my experience installing and troubleshooting allot of sound cards
I'd recommend the following for sound quality and reliability.

Fire wire-

Presonus Firepod

Focusrite Saffire LE

USB -

Mackie Spike

There are a few others that would well but these are the ones that I liked most for sound quality.

If you don't absolutely need it to be fire wire or USB then I'd go for the EMU PCI cards. Lots of value with their sound cards.

Chris Ludwig

ADK Pro Audio

(859) 635-5762

www.adkproaudio.com

chrisl@adkproaudio.com Nuendo and Sequoia here. I switched for features and workflow mainly.

Delay compensation, quality midi and VSTi, and better editing and production capabilities in general (post features, etc) have been key for me. Paris' converters were good at the time, but there are a lot of great options now in a similar price range that supercede them in varying degrees.

Imho, sound does come down to technique and approach - the capabilities are there with most DAWs now - it's just a matter of learning the differences and making them work for you, rather than working against them expecting something else. Feel free to email me offline if you want since this may not be of as much interest to Paris users here.

Regards,
Dedric

> chrisl@adkproaudio.com I've been doing a little playing around with a new reverb processor tonight
and about the time I wwaent brain dead from readiong the manual and tweaking
the parameters, all of a sudden I realized that This Sucks was really
bouncing around in my headspace. That's another really good one. I'm going
to take one of the CD's over to my buddy who knows Tony Ferguson tomorrow.
We're setting up the expo gig in Park Cities right now. I want to see what
his teenage daughter (high school seniors) and her friends think about this

CD. I think This Sucks may be a generational anthem.....sort of like For What It's Worth by Stephen Stills/Buffalo Springfield was for my generation. Fingerprints is cool.....very catchy musical arrangement for such a dark topic. You pulled that one off well too.

Cheers,

DJ

There's an interesting discussion going on over at PSW about this DAW, was

wondering if anyone's heard of it, tried it, using it

<http://marsh.prosoundweb.com/index.php/t/9107/>

Donl just scaled back my Paris system to one EDS1000 card and sold a few interfaces. I switched to Nuendo mainly for features. Things like being able to Quantize Audio tracks made it worth the switch for me. Amazing how tight you can make an average drummer sound. :) I purchased the Tascam FW1884 for my interface and how I survived without motorized faders so long is beyond me. I also use MIDI in a BIG way and that was another key factor for the switch. I've used Cubase since my Atari 520ST days so the switch was pretty painless for me.

Paris rocked in 96 ... 97 ... and it still has one of the best sounds out there but I think it's time has come and gone. :(

"macle" <Mates9999@cs.com> wrote in message news:44b6c031\$1@linux...

>

> Just curious...

>

>

>What exactly does monitoring in mono mean?

Is it panning many stereo instruments to center and

listening to the mix from a pair of stereo speakers?

OR

Summing a stereo mix together and listening to the mix thru one speaker directly in front of you?

How does one go about checking there mix in mono from within PARIS? (QUICKLY)

How about the same question , but from within Cubase?

Thanks!!!!!!!!!!

Brandon,

Click the Mono/Stereo button on the mixer near the monitor level pot.

Listen through both speakers. Get tones/levels in mono retaining clarity then hit the switch to stereo and see how that translates. More

> If you are clocking an RME HDSP card from a Paris ADAT card (or in my case clocking 3 x RME cards from 3 x Paris ADAT cards) and, for convenience sake, since you want to be able to monitor your HDSP I/O in Wavelab without launching Paris in order to clock the HDSP cards and you are too f***in lazy to make one simple change in a digital patchbay GUI , you decide to also hook one of the RME cards up directly to a WC feed from your external clock that is also feeding your 4 x MECs which are then sending this WC sync from the ADAT modules to the RME interfaces because "since the ADAT modules are just regenerating the WC that they are receiving from the house clock this should be the same" you will have loads of fun when both computers start losing sync, and not only losing sync, but freezing completely, requiring a hard reboot. Not only will it be fun while it's happening, but you get the added benefit of having to actually shut down every computer and digital device in the studio for a little while, then after they have calmed down a little, start your boot sequence all over. The various devices may still be pissed off at each other for a while and you may need to try a couple of times before all of this stuff is willing to shake hands and play nice.

That's about as simple as I can explain it.

;o)Another good one Rick.

reface so you will need to ignore the extra channels. The
names (AN) is for analog and (A1) is ADAT port 1. YOurs might say A1 or
just A not sure on Multiface.
Hopefully this can make you get it.

Chris

I feel compelled to tell you that your hi-res website looks very cool, with
lots of stuff moving around and all, but the text at the bottom seems to
be cut off, since the last line reads:

"I think almost every single song on"

On the other hand, if you don't have Sarah's CD, well, you're missing out.
It's very very good...

Of course, I'll have to get yours now to compare...!

Pete-the next page I checked, Bio, was likewise cut off at the bottom. The
next one I checked, links, froze Firefox to the point that I had to force
quite the program!

Something's goofy.

Firefox 1.0.7, iMac G3 OS 10.2.8

The site works ok for me in firefox, it's not that intuitive though I admit, bit of an experiment in Flash ;) Are you aware that the Angel and Bat icons to the left of the screen are scroll controls?

Best,
Pete

p.s. your CD will mail tomorrow!
