---=_linux4461685e--You get one shot...

Jack has all kinds of out-take discs from nearly everyone in Jazz.

I've heard quite a few and I must say that the original discs, even from 1938 or so, sound really quite good. Analog, of course, turns to crap with copy after copy, but that was simply the only way to make records for the public. And of course, the master would wear out eventually and the copies made earliest in the run always sounded best. BUT, if you ever have a chance to hear the original disc, they are often quite impressive.

Yes, players had to have killer chops back then. BTW, you did NOT want to be the poor soul who played a clam on a Benny Goodman date...

Great Move!

I worked on a few.
I never worked with the Duke, but I did work with Teddy Wilson, Eubie Blake,
Earl Heinz, The Stan Kenton Orc. and a few others.
Loved that shit.
GeneGood to hear.

Looking at that photo of you making the post with the photo in it is like
looking at one of those photos where you can see the photo you're looking
at in the photo.

I see a familiar looking UPS on the floor... ;o)

Cheers,
Kim.

I/O's properly assigned? i'm also assuming you have the midi cables
connected to there proper port assignments. i have mine (4 version)
connected to both my mac and pc via a usb hub and also using midi
cables connected to the various gear (m24 controller and a pro 88 kb).

Most of them were with Hank O'Neal, who was just starting Chiaroscuro Records here in NYC. Hank had the great idea to start a jazz label to record all the great old legends that were still around but not signed to any label. I was just starting out and primarily I was acting as an assistant, for which I never received any credits (or pay), but it was a great time for me, and after doing several recordings with Hank, I started to gain a reputation for understanding jazz recording. So I benefited in many ways.

Most of the Chiaroscuro sessions were very minimal. Typically a live mix into a two track. An example would be a session I did with Hank and Teddy

a former brothel that Teddy had worked at many years earlier. We used my Revox A77HS because it was brand spanking new, and a few Sony condensers (ECM22-P probably.) Many of these simple recordings still hold up very well today.

build my career as a producer, my entire record collection was ruined by

I should have rebuilt my collection over the years but I always put it off.

:-(

Gene

P.S.

Some of the details like the exact name of the record and the mics used,

say....always though

he was bulletproof....

I'm reading Geoff Emerick's book about recording the Beatles. One thing he mentions over and over is that they would work on vocal harmonies with George Martin and rehearse them for hours at a time. Perhaps all the folks on Gearslut looking for the perfect mic pre should consider that. In sweltering Tucson? This is a multi-part message in MIME format.

Rick,

Thanks for the help Rick

Are you passing MTC through it or is that outside the box?

Do you use a separate MIDI box for Cubase to get to it or

do you leave the USB in while in use? Are able to get

MIDI input? I have to triple check my settings for that.

It shows 8 ins, 8 outs and the SMPTE in outs under my

list of MIDI ports. I assign the output of my master keyboard

to Cubase, engage record and yet no note data is present

when it's complete. ???

While hooked up via USB the box outputs data to everything fine.

I have to disconnect the USB to get my presets to function though.

Seems odd. Once the USB is disconnected then there's no=20

link to Cubase! =20

I'll try some more things,

Tom

"rick" <parnell68@hotmail.com> wrote in message =

news:9ce36216huotqa14la25bho89g7mivothp@4ax.com...

it's been a few months since i've used sx but do you have all your

I/O's properly assigned? i'm also assuming you have the midi cables

connected to there proper port assignments. i have mine (4 version)

connected to both my mac and pc via a usb hub and also using midi

cables connected to the various gear (m24 controller and a pro 88 kb).

I had no luck with any of the suggestions I have received so I went back = to my *pre-tweaked* Ghost image and reloaded it.

I did all of the preliminary tweaks (prior to the part where system = services are tweaked). Everything worked fine. then I started doing the = recommended changes to system services.....no disabling of any of them, = just setting them to manual. I did two to three at a time, thinking I = could always go back and set them back to the defaults once I hit the = wall.....wrong!!!!=20

I'm not sure exactly which service, or combination of services being = changed fromn automatic to manual is causing this, but it's definitely =

being caused by making changes in this area. To figure this out, I'm =
going to have to "Ghost" after I make each one, because once the fatal =
change is made, resetting back to defaults does not work. This will take =
a very long time and each Ghost Image uses quite a bit of HD space. I do =
have a 200G drive here and I may just do this for posterity's sake. It's =
just one of those things that could save some poor schmuck like me a lot =
of grief. I don't have time to do this right now. this system is rocking =
right along with the tweaks that work and I've got 12 songs to mix. Once =
I can come up for air, I may go back and Ghost the system services =
tweaks one by one until I find the gremlin.

Thanks Neil, Aaron...et al for the help/suggestions.

Deej - going where no man has (been a big enough dumbass to want to = have) gone before.

>Thanks Chris.....I think this statement from the omnipotent elder geek pretty much sums up my experience with this, as follows:

Frankly, I don't recommend you change any of the services from the default installation of XP. Yes, you may pick up a tiny performance gain by fiddling with the settings, but it won't be anything substantial. It's just my opinion, but if you are in a situation where these gains are necessary to achieve an increased level of system performance, it would be wiser to upgrade the physical system to one that is adequate to benefit from the XP operating system.

.....however, now that I know of the eldergeek.....my life will be a living hell until I read and attempt to grok all of this.

If a tweak is done in the woods and no one is there to hear see it, did it make any noise at all?

;o)
