I don't think Cron was from Dorchester. I was thinking either

Boston proper or the north shore.

I might be wrong though.

>Hi

I'm trying to get inspired to work the ole Paris again and was wondering if

any of you would be willing to share your music with the group. It seems like a lot of you have really taken the Paris to the highest sonic levels and I would like to hear what you all are getting.

If you wanted to take a small portion of some work and keep it as a wav file that would be really great. I'm hoping that hearing some good tones will inspire me to get back into it.

Much appreciated.

Barry

p.s. music that has vocals would be preferred. thanks. The talented Jason Miles CD will surely fire you up.

>Don't feel bad Kim. I was over rock in the early '90s. The problems with a
lot of rock are the musicians are often pretty uneducated and unskilled, and
they are often seeking popularity too much.

Don't worry there is A LOT of other great music out there.

>I'm thinking about trying to get rid of as many software effects as
possible. Is the idea of buying 4-5 RNC Compressors for drums along with a
couple of good compressors for vocals and bass a crazy idea. The goal is to
get the signal close enough on the way in that any touch up can be done with
Paris software thus eliminating the latency situations.

I'm guessing that most would find this ludicrous, but if anyone is
succeeding with such an idea I would be curious. Hardware is almost always better than
software... your idea is
definitely a good one. The plugs are still useful for "mild
treatment" though.

David.

I'll give it a try.

I did a search on the blue screen VXD--- error.
It's nothing new and has plagued various Cd applications for years,
sometimes
with no known solution. S@\$&*%\$#T!!

Luckily I don't need a Cd burner for a few days.
