I have been with Hostway.com for years and am very pleased. So far, it has never been down. They have a ton of useful tools when you log into their site and several different plans. I use the \$13.05/month plan and I have the option of paying yearly if I want to also - which I do. For that price (the Gold Plan) I get 12 gig of web space! 250Gijg/mo monthly traffic, and up to 250 email accounts (yeah, like I need that many lol). Here is the link if you want to investigate:

<http://www.hostway.com/web-hosting/index.html>

least if they eventually become nearly perfect. A lot of people always
see technology as a "this vs. that" but us gear hounds always want one
of each...

heh

keeps this town alive. Without the natural beauty and tourism it generates, the only reason to live here would be the small college here and the natural gas fields that start on the south side of the

town and seem to go on forever. This place is wall-to-wall with people from all over the world right now driving around looking at everything but the road in front of them.

;o)
