he newer 32bit model it shows a round cable.

Hope this helps,

El Miguel

nHi Migel,

I'm not sure when, but at some point, Magma switched from custom made 80  
pin ribbon style cables to connect the host and system cards to a standard

68 pin scsi cable. Unfortunately, people like me got "great" deals on the older style of chassis, only to run into the severe shortage of the older cables. Magma doesn't sell, support, or even provide specs for the older cables anymore.

bottle of primary red in  
a store it would not be as red

standard rogue pickups better than 1000 emgs and dimarzios played on  
a base that god himself plays

it has a body like an ibanez, but trust me ibanez ripped off rogue,  
rogue is the king of kings of bases and there is no way that ibanez  
came up with this body first, its just so cool and so...rogue

this bad boy has large 5 string scale frets, because 5 strings look  
cooler due to their thicker necks, and rogue wanting to make the  
greatest bases ever, decided to make them look cooler by giving them
