in the 1970's the same people were squealing
about global cooling. Worse, the ice core evidence shows
that increases in carbon dioxide level historically follows warming
not precedes it. Carbon may not be the problem.

>You should read a little about Martin Durkin, the man you are defending.
>I'm not about to get into an argument about Global warming...but I do
remember my Grade 10 science and the chemical make up of the atmosphere and
from that perspective alone Global Warming being caused by CO2 doesn't make
any sense and it makes even less sense when you use the numbers the IPCC
uses to prove that CO2 emissions are the cause...bad science...plain and
simple.

On the otherhand, I reduce, reuse and recycle and have spent thousands of
dollars making my home energy efficient and drive as clean and efficient a
car as I can afford...I'm doing my part and will continue to due so...but
not because of scare tactics and bullshit science but because it's the smart
thing to do.
