(859) 635-5762Hi all,

Haven't been around here much in the last year or so.

Glad to see that the Paris community is still alive and well.

Anyway, there's a guy on American Idol this year that I used to work with quite a bit. His name is Taylor Hicks. If you haven't seen it he's the grey haired guy. He's a very soulful singer with not an ounce of pretense. Check out his version of "Georgia on my Mind" at this link. It's a live recording. Don't know who the engineer was. <http://taylorhicks2006.com/music.html#>

He also plays a mean blues harp.

peace,

T.RossiThis is a multi-part message in MIME format.

LaMont,

I'm glad it was that easy!

Tom

Hi Lamont,

Wow weird stuff. Glad its working now.

>My \*better half\* back in the 70's was a native American lady from Simcoe  
Ontario. I was amazed at many of the the social programs available to  
Canadians back then. I met her when I was living in Mexico. There was big  
Canadian community there and they were all actually was having checks sent  
down there from Canada and lived there all winter on some kind of government  
subsidized unemployment. In the spring, we would all head back to Texas and  
they would all sort their travel arrangements out and head for their various  
spring/summer jobs. Then in the fall, they would come back down to Austin  
and we would head back down to Oaxaca. I was always jealous of this  
situation. Everything was paid for.

As for the healthcare situation, I was watching some expose' on socialized medicine in Britain a while back and there is actually a provision for free elective cosmetic plastic surgery. If that's the case in Canada, I'm going to move up there so I can get that operation I've been needing so I can look more like Jessica Simpson.

;o)

than do citizens in Canada, Germany and many other industrialized parts of  
from breast cancer and are taking Tomoxifen to save their lives pay \$134  
for a 30-day supply in my home state of Indiana and up to \$360 in other parts  
of the United States, while in Germany they pay just \$60, and in Canada they  
pay only \$33 for the very same product. Not only is that outrageous, it  
is just plain wrong. I have held four hearing in my capacity as Chairman  
of the House Government Reform Subcommittee on Human Rights and Wellness  
regarding the safety and efficacy of imported pharmaceuticals. Despite clinging  
to claims of the dangers of counterfeit and misbranded drugs, the pharmaceutical  
industry as well as the FDA have been unable to cite a single incident of  
adverse health reactions caused by Canadian imported FDA-approved prescription

This is a good read from:  
[http://www.house.gov/apps/list/press/mo08\\_emerson/pr\\_031028.html](http://www.house.gov/apps/list/press/mo08_emerson/pr_031028.html)

This is from legislation proposed in 2003. Naturally, this legislation and  
the two dozen other attempts to reign in profits, unfair trade policies and  
tax breaks for pharmaceuticals have all failed.

From the same Press Release:

development of prescription drugs - for which we get little reimbursement  
from pharmaceutical companies. The pharmaceutical companies get a dollar-for-dollar  
tax credit. The pharmaceutical companies get a protected American market  
that shuts out competition and keeps prices artificially high. What do American

If you work hard, keep you nose clean, you can  
live the dream. Well mr gazillionar corprarion, we worked hard, some of us  
got the education, and paid our taxes even when you never paid a sigle cent  
of tax. But, here we are being asked to continue to line up you coffers  
while you give us NOTHING\$\$\$ in return..
