(859) 635-5762Hi DeeJ,

I don't get to use that many of the cue mix functions in Cubase but I've found the punch in/ out and general recording functions way easier than any program I've ever used.

Especially when you setup a folder track for your multi track recording.

Major fun being able to hit one button to punch in and out of 100 tracks

at once with one key command and no hiccups or pause when doing it. The asterisk key is your friend...

Chris

(859) 635-5762Check out page 152 of the manual. Using any of the 4 cue mixes, you can select a bunch of tracks in the regular mixer then go to the control room mixer and right click over a single Studio (cue mix) and tell it to paste all of the selected track levels to the cue mix for starting point or even change the volume of all the cue mix sends. VERY nice.

If you don't right click over a Studio mix then it applies to all Studios. Seems nicely done.
