Has anyone had trouble with the UAD v 4.5 software in Paris with XP?
I had some latency issues and reverted back. It may have been
something I did wrong at my end though. =20

How does the Helios eq compare to the Neve 1081?
I'm considering one of the two in the next few days before the sale=20
runs out. I own a few Neve broadcast modules that are akin to
the 1073 so I'm not lusting after more of that. I really like and use=20
the Cambridge too. What would compliment those flavors best
remaining in Paris? I use Precision 8 pres mostly with a smattering
of Tele V72 here and there. Projects run the gamut - mostly pop,

hard rock/metal and acoustic. Some synth/orchestral too.

Thanks for sharing your experience,
Tom

> Doug, do you think it can all be done with Apple core audio?

All of the audio input and output can be handled with core audio. What
doesn't get directly handled by core audio is handled by other parts of
Apple's I/O Kit...

Doug

<http://www.parisfaqs.com>Hi Jon,
make sure you load the newest BIOS before you getting to chipset/driver
updates etc.

leave the sata controller on ids mode the raid mode is not very reliable.
Make sure you use the AMD dual core optimizer driver and the ULI chipset update from Nvidias website not from ASUS website. Don't use the on boards sound.

Don't use 4 gigs of ram the board is not as stable with 4 gigs.

Yeah, B.B. is amazing.

So is Buddy Guy. Saw him last year - dude just tore it up. I want to have that much energy when I'm 80.

I have the attached sitting here at the moment... I am VERY tempted to load up the demo and A/B against the hardware...

David.
