Jeff,
Thanks! A step by step would be great since I've only done this a few =
times
with varying results. Sometimes it works and sometimes it doesn't.

Tom,

Crossover cable should be fine. Just make sure on each computer you=20
force the configuration rather than let it "auto detect". You'll find =

this by going to the network control panel. If you're using IP, =
you'll=20
have to manually set the ip address and make sure they're on the same=20
subnet.

Let me know if you need a specific example.
