Paris. (One of you said you use a Mac G4 450 machine, another a dual 1GHz
G4, and another a 1GHz G4 Quicksilver. Another pointed out that the computer
I get will need to have a 5V compatible PCI slot.)

As far as I can tell, the last Mac model to boot up in OS 9 with the right
have the FireWire 800. I believe it came in three flavors: 1GHz, 1.25GHz,

One more question before I try to buy a used G4: Has anyone been able to
in early G5s?

Any other comments or suggestions that come to mind are more than welcome.

Thanks and best wishes,

Richard FaylorMartin, thanks for the info... so lemme ask you this:

Are you using the EMU card for Nuendo too? or do you have a separate card/interface in the same computer for Nuendo?

Neil

Actually, I'm a multi-Mac guy, with the G4-400 Sawtooth with Paris, a G4-450 for my Oasys card, and a Duallie 1GHz Quicksilver for daily use/iTunes server/file server.

Will not work. Needs native OS9 for driver and hardware access. It will not load under Classic.

pabHi Neil

I was, (and will be until I get my M-Audio Delta 1010 back), using the Emu card with Nuendo.

I was / is the primary card in the computer.

The eds compressor as an insert in a mono channel doesn't really work and
also all the presets are gone.
At the same time everything works as a master insert (even if the preset are
still missing).

A BIG THANX to all that help this great sounded system to still work.
AlexHi,
What I would do is reinstall the subsystem effects in you Paris directory.
You know the minimum setup exe
Be sure that this will install in your Emu folder.
Regards,
Dimitrios

So if I got one of these cards, primarily for the EFX, just to have some more variety & lighten the CPU load when I'm running more EFX, would I also be able to use it at the same time in the same PC as my Multiface/card combo? For example, if I had my multiface full up recording with all 8 inputs, could I use the inputs on the Emu card at the same time if I needed a couple more in's? I've never run two cards before, so I don't know if this would work.

For that matter, if I was using the Multiface as my main interface/card, regardless of whether or not I wanted to use the Emu card for more inputs as mentioned above, could I still access the EFX on the Emu card & use them as plugins?

NeilThanks D, I figured there was no work around to the fact that the drum tracks would need to be copied. This is sort of the same deal we talked about 2 weeks ago regarding using the EDS comp in the aux.
I'll have to check out that compressor you mention. or get another EDS card.
