>Ron,

I just did this a couple of weeks ago. It took them about 6 days to get back with the response codes.

Did you send them your 3.0 license number and EDS-1000 serial number? They require both of these. Perhaps you did not and they just forgot (or chose to forget) to reply?

I'm on a Mac so the "anti-pace" is not an option for me.

Also, you can install a different HD and get another 7 days on the trial. A hassle, but better than turning away paying clients. I'd call them on the phone before losing business.

Hope this helps!

Mark
