"Enable
write caching on =
the=20

disk", remember to UNTICK them. You can do that on
your audio =
harddisks=20

only or and on your c too.

3) Remember to use "background =
services" and=20

System cache for memory usage.

4) Now DISABLE DX support =
on your=20

Paris cfg or you can disable this on
Project Paris window =
....

5)=20

Use the vst version of any plugins you have .
If you happen to have =
waves=20

plugins there is a neat free audio program
that can make vst =
indivindual=20

plugins from waves waveshells.

6) Put all your vst's on root=20
again.
That means to REINSTALL your vst plugins in the=20

directory: c:/VST

7) Use your Chainer vst wrapper =
to open=20

your vst plugins.

8) You can make a default project with all =
youer adio=20

tracks having a
chainer already loaded where inside can be =
faderworks too=20

!!

9) If you h
