says the Farichild mono and EX M plug is not installed. To defeat =
this, install
4.5 again, specifying a folder other than the correct folder (you will =
delete
it later) and select the "install mono versions"
box. Go into the mono folder that's in the folder you chose, copy the =
Fairchild
and EX-M DLL's

(there the only ones that don't have the word (mono) in parenthesis) =
and
copy them to the correct folder. Then delete the bogus folder, or the =
UAD
dll's. I use the steinberg/vst folder, since that's what it defaults =
to,
and that's not what I use normally. You don't have to do this, but if =
the
error messages bug you (they do me) you can. The mono versions don't =
work
correctly in Paris, but it keeps the error screen from popping up.
