'm going another direction. So I'm dismantling my fully working 3 card rig and selling it all.

For sale:
(1) EDS 1000 card - $125 shipped to the US or Canada.

(2) Black 8 Input cards - $125 each shipped to the US or Canada. I'll include a free SMPTE card with the first card bought.

(2) Black MEC's - $50 plus shipping. Some of the blank panels may be missing, thus the cheap price.

(2) Black C16's - $50 plus shipping.

If anyone wants it all I'll do $500 shipped, that will include all the cables I have and most of Mike's extra plugins I've purchased.

I'm open to all offers also, it all has to go to make the wife happy. I can send pictures if needed on any items.

I take paypal or bank to bank payments.

Contact me at willtheweirdo@gmail.comI still have 2 8 input MEC cards for sale, email me at the above add

ress if you are interested in them.All,

I just listed an ADAT card and 8-input card on Ebay.
Starting bid is $20 for each of them, with no reserve.

RonI need a backup EDS 1000, 'cause one of mine has died.....
if anyone like to sell one to me, WRITE !

DanNot sure if this thesoniq is still in business, but he has EDS 1000 on his website:
http://www.thesoniq.com/Sale.htmlI try to mail them, but the E-Mail adress isn't correct !
I guess you could try calling him. I know you are overseas, but it may be worth a try. I bought a backup system from him some years ago. PARIS rocks!Hi all -

Does anyone have an extra CS16 or two? Seems like mine are struggling...

Ted

OK - looks like I'm set. Got the C16 situ sorted.

Thanks.

Ted

heweirdo@gmail.com." target="_blank">willtheweirdo@gmail.com.

I'm needing 4 Output cards and 1 input card.All,
If anyone is interested I have a C16 for sale on Ebay--starting bid $15, no reserve.
RonHi all,

This has lived in one studio it's whole life. I have kept this going for a long time but it is time to let it go. I have moved to a new console and all this is up for grabs.

These are black MECS and controllers.

Guy Eckelberger
Shutup & Play Studios
https://shutupandplay.com/Hi Guy,

I'm interested in the EDS-1000 card. Can you tell me how long it is? I'm not sure it will fit my motherboard. Also, let me know if you'll part with it separately and if so, for how much.

Thanks,
BradenWhen I said up for grabs. I meant you pay for shipping and it's all yours. If you want to throw me something for it all good.

Sorry for the slow response..been busyYeah, I'll pay shipping. I'm not sure it will fit my mo

g (continental US only).

I'm not sure what I/O cards I still have at the moment. When I get home I'll update the post with further details. For sure I have two EDS-1000 cards, the MEC and CS16.

Feel free to contact me: rohdeww at gmail dot com.

Thanks!

-RohdeHi There. I know you don't want to ship outside the US, but I think one of my EDS's is
