Thanks for the advice. I'll keep that in mind for sure. I think I've decided, for the time being at least, not to purchase the \$139 perfect pitch course, for now at least.

From a few posts around the net that I've found, and some comments here, I think I have the basic idea of what is involved in perfect pitch. I've invested \$12US, which is nothing, in a little utility that throws notes at me, so I can test myself. That should allow me to develop things if I wish. I'll play with that for a month or so and see how

e the Matrox sysutil 1805 to

downgrade the Matrox BIOS so the Splash screen and mobo BIOS can be viewed properly without upgrading to the ASUS 1017 BIOS from hell.

Install the 2 x RME HDSP 9652's in PCI slots 2 & 3.

Install the Magma host card in PCI slot #4

In the Magma chassis, the slot assignments are as follows:

1.-UAD-1

2.

3. RME Multiface PCI

4.

5. UAD-1

6.

7.

8. UAD-1

9.

10.

11.

12. UAD-1

13.

I'm playing back a 31 track project with a 98% UAD-1 resource load with the buffers set to 512k (6ms). No crackling in the audio.....at all.....and no dropouts or glitching. System isn't even breathing hard.

This is with my system marginally optimized for audio. None of the recommended registry tweaks have been done and none of the system service tweaks have been done either.

Thanks again to Chris Ludwig who has been extremely helpful in showing me the way to get this to happen.

DeejDJ,

I appreciate you passing this information on.

I also recall reading his columns in Mix and thinking what wonderful ideas he had -wrapped in a nifty and engaging writing style. Whenever I picked up Mix, I always checked out his stuff first. When I learned that he was one of the Paris designers, it lent a very cool vibe to the product. Its weird, but there has always been something "in" or "be

>SSC was always very interesting to listen to and I really enjoyed his Mix article immensely. What an amazing life really. I think Paris is more important than homeland security though and wish he could have recruited Skunk Baxter over to Paris, It would have been a natural.

Was it just me or did you all perceive that SSC had a huge spiritual energy. He just seemed very connected somehow. Maybe it was having cash that helped. hehe. I'm sure Edmund and others are mourning the loss of a very close and dear friend. I'm reminded of Mr. Eddie Kramer of Hendrix fame who I met and recalled that he was still mourning the loss 30 years later. Life is TOO real.

I recall SSC saying he worked on a famous movie soundtrack (probably many), so does anyone recall what music he was involved in regarding mixing and such? Was he into cowbell? :-) I would be interested. It's a shame that I didn't know while he was here.

Subject: THANKS GUYS! I also use Hammerfall/RME + Nuendo but prefer Paris for vocals.
