Mike,
What power supply did you replace yours with?
I'm not sure how to find out which will and will not
handle 'no load' on the 12v side.

I'm looking for something hefty in the 600watt+ range.
Tom

Tom, that totally sucks!

My Magma PS went bad, too, but it was completely dead - wouldn't start =
at
all. No sounds, no fans, no nothin'.

If you do replace it, just make sure you get a PS that can handle =
having
no 12 volt load. You may have to get an older one.

Good luck!

Mike
