be nice.
units include VCR, TV, Surround Receiver, 2nd DVDr/rw, camcorder, fan (yes,
I actually have a remote control for my stand up room fan hahah), DAT and a
DCC.
The only thing I've found thus far that can handle most of it is a pocket
PC.. but even it won't hang the whole lot of 'em. Not to mention it was
about \$600 (gulp)

I don't want too much, do I?

Thanks !

AA

Dude!!!!!! ROTFL!!!!!! Don't change a thing!! You just need an infrared
patchbay to get this happening!!!!!!
;oD

may have to do with
Native Instruments plugins, whatever's going on with my system drive or
?. Or maybe a recent update fixed something. BTW, I do send bug reports
to Apple so they've seen the detailed crash reports.

The bug where Logic stops playing back a virtual synth did come up one
time today. That one needs to be fixed. Reloading the song is the
workaround.

On the plus side, Logic on a dual G5 is incredible in its capabilities
and the music is sounding great.

Nice to hear from you, Thad.

Cheers,
-Jamie
