Hey Tom,

I'm using Seagates as both my system and audio drive. Both have =
been working for about four months und

er moderate usage without any =
troubles. After reading articles on this site: =
<http://www.storagereview.com/>

I felt very comfortable going with Seagate. In order to access =
the reliability data you have to jump through some small hoops, but I =
think its worth it. =20

MR

news:43e27ec2\$1@linux...

Cubase has asked me the question:=20

Pending Connections: Direct Music/Midex 3.1.

Should this be assigned to my MIDI card?

It isn't listed as one of the options. The only thing

Midi related is Midi Map. Is this where it should be?

Everything is working now with it assigned to the

Delta 66 A-B out. =20

I am in need of a new ide drive. Is Seagate the current
'go to' drive company? I'm looking at the 7200 - 8 meg cache =
job.

Thanks for all your answers.

Tom

if a huge drive like</DIV>

<DIV>Jamie's talking about (320 gig) goes =
down and it's=20

any where close</DIV>

<DIV>to full you lose a lot of data. =20
Spooky=20

thought. =20 I do make backups</DIV>

<DIV>but if a huge backup goes down it's =
even more work=20

to (as Rage says)</DIV>

<DIV>"Rectify" . Awesome =
tune.</DIV>
