her FS post) to integrate
older outboard processors into an 88.2 KHZ environment. they worked
perfectly.

These boxes are really the only device of their kind that do what they do
for less than a few thousand dollars. One of them has a crack in one of the
little plastic windows but works perfectly.

\$90.00 each for the four that are in mint condition and \$80.00 for the one
with the little crack in the window.

These come in the original boxes with manuals and are "like new". they are
very handy A/D D/A converter.

They'll be going up on EBay in the next couple of days if no one owants them
here.

DJHi,
David,
So what do you have in mind for it ?
Does it have adat card ?
You are looking for direct sale or trade is welcome ?
Let me know what you think.
Regards,
Dimitrios

news:46f730b4@linux...

I'm moving to an RME MADI/ADI 648 system with an AES 32 card so this =
stuff has got to go.

3 x RME HDSP 9652's - \$425.00 each

If you want to sync a sequencer to your Paris rig, this is the card to =
do it. I'll guarantee it to slave to a Paris ADAT card if you're running =
Cubase using ASIO positioning protocall. I did it for three years.=20

Frontier Designs Apache Optical Patchbay in "mint" condition. I had it =
racked for about a month, then decided to go a different route to it's =
basically NIB- \$500.00.=20

Unlike the older Digipatch, this one will pass 24 bit.=20

Here's an accurate review:

<http://www.proaudioreview.com/pages/s.0032/t.3472.html>

RME ADI 4-DD - this is a very cool ADAT>AES format converter (works =
with S/PDIF too using an XLR>RCA adapter). You can take an ADAT I/O and =
convert it into 4 x stereo AES I/O. Included is a a 20' long TDIF>4 x =
AES M & 4 x AES F connectors.- \$550.00

If you need more stereo S/PDIF I/O and want to integrate some AES or =
S/Pdif connected gear with your Paris rig, this is definitely the =
ticket.

<http://www.rme-audio.com/english/adi/adi4dd.htm>

The little trapdoor dust cover on the ADAT output came off this unit. =
That's the only flaw with it. I'm going to try to get a replacement from =
Synthax tomorrow.

Any/all of this stuff guaranteed to work perfectly. I'll refund =
anyone's money who isn't happy.

Last call before EBay.

-----=_NextPart_000_0094_01C7FF88.BEE544C0--No ADAT card. I was thinking direct sale, but what do you have for trade?

David LI have the following, all black, all in excellent condition:

- (1) MEC \$75
- (2) 8-in cards \$175 each
- (2) 8-out cards \$175 each
- (1) SMPTE card \$100
- (3) EDs-1000x cards \$175 each
- (2) C-16 controllers \$50 each, free SW-10 foot pedal if you buy both
- (2) 15ft. SCSI cable \$30 each
- (1) Paris 3.0 CD neg. or free if you buy a lot of stuff

ALSO:

- (1) MAGMA 7-slot PCI expansion with all connectors: \$300
- (1) Tascam MA-8 mic pre-amp: \$250

Shipping depends on where you are; actual costs only.

PayPal works best.

Contact me: yochris AT comcast DOT netDear David,

What is your asking price ?

Regards,
Dimitrios

\$450.Hey DJ -

Did you get my email? I'm interested in one of your 9652's. Will it fit in a PCI-X slot?

David LHi David,

I just replied to your PM. Yes. these card will work in PCIX.

Regards,

Doug

>Dear David,

Although your price is fair I bought some things and I run out of money right now...

The only thing I have for a trade is a Presonus Eureka with JENSEN input transformer and best opa's AD797 for a Class A transformer mic preamp with compressor and Eq.

This unit rocks.

I don't know though if it is of any interest to you.

Anyway thank you for your time and if you are interested on the above device please let me know.

Regards,
Dimitrios

That the stock Eureka's have chines transformers !!

Chips also are simple NE5534.

I can also spare for you OPA2132 for a different sweeter spund to change.

The opa's sit on saddles so there is no soldering to change for other opa's.

Regards,

Dimitrios
