alled "Sheep Shaver". It runs as a Windows Program. It
wont run PARIS because it has limited hardware support, but it should run
code warrior and compile PARIS code just fine. I got my hands on a copy
of code warrior and was all set to give it a run, but the copy I got will
compile for OS 9, but only runs in OS 10. I was saddened.

>No, see that's a good example of what I'm talking about. I always thought
that "Aaaaaaaaah!" from Immigrant Song sounded like falsetto, and kinda
wimpy. Compare that to the long "Baaaaaaaaaaaaabe!" after the first solo
break in The Lemon Song (about 2:25 in).

wise we've chosen to move a little further out where property and cost of living is much less, consulting lets me do much work remotely and go to "the city" once a week. My kids know who I am, my wife couldn't be happier, and it looks like within the next year I'll be putting up a new "toy barn" for the studio to reside in once again. My son has started writing song lyrics and is learning to put them to music, and dad is there to help along the way.

Your skills will translate. If you can handle pro studio patch bays and tracking the traffic, modern and not so modern DAWS and their eccentricities, then setting up the average bus
