here that
will easily setup... and record what I am playing. So I can dub another midi track over that? Everything seems to be directed at pre-made midi, or notation software when you have to manually change the bar, beat, note, etc. I want to hit freakin "record" and hear a pre-selected tempo, play chords along with my midi keyboard and it record the darn thing. I don't want to stop and change things.. I want the software to know what I am changing and record it...

Perhaps I am asking too much? Surely these midi files were not created note or staff at a time. Of course, my notebook's soundcard is limited and that is my only playback... but maybe the sequencer software can enable me more sounds?

Is there anything out there that is like that? I tried the Finale freebie... but that's a no-go. I play to try the Notation Composer which claims to do this (but so did Finale).

Any midi/Notation gurus out there? Oh Shoot! I think I found what I was trying to find...

Anyone familiar with this software?

<http://www.wildcat.com/Web/Wildcat/Html/Site/Homepage.htm>

I am gonna get it and try it... Hopefully it is not a waste of my time and especially my money...

Because audio users aren't anywhere close to being part of the "masses" these companies make a living from.

I'm sure the chipset works with a reasonable range of general firewire devices (drives, consumer camcorders, etc), but imho, firewire isn't a guaranteed reliable solution for

the 1 to 4KHZ range and lacking =
authentic=20
vocal sound character.
Also, the bottom around 80hz is sometimes thin =
on the=20
mix. I simply have heard a "sound signature" of thin bass =
punch,
polite=20
sounding snares and rolled off top on mixes.</

>I'm getting ready to plug in the second EDS card. I got the WC cable
for the MEC-to-442 connection.

I forgot about the damn ribbon cables.

And it looks like when I bought my second EDS card several years ago,
all I got were the two larger cables, not the two smaller ones. I
didn't realize there were four internal connections as well.

Looks like I'll be limited to 16 channels tomorrow.

Damn.

Where can I get the small cables?

publIf you want to be in pop, forget your chops, buy a lot of fog and lights,
sequence and hire pretty boys and girls on contract to surround you. Be
creative with visuals, because the 'music' part of that is dead in local pop
bands and ppl listen with their eyes.

Make it loud and thumping, and make it an event, or no one will show up/come
back. remember the golden rule: boobs sell beers. Advertise, push push push
and sell it. If anyone in your band forgets that, remind once then replace
because there is absolutely no forgiveness in local/regional band pop. Do
this and you'll likely quadruple your income figures or greater. Keep it up
and you might become a decent touring act. Put money away, because there is
no insurance, no retirement and no promises in that field.

much Neil, and John and Don, Sarah, and Aaron for all the comments.
Every bit of what you folks had to say was helpful. I'm taking a brief
break, but I'm up in the studio making many of the changes folks suggested.
As to Ron's playing, the drums tracks speak for themselves. Amazing really.
It feels like I was in the room playing with him. (And I wasn't. I'm up
in the northeast and he's somewhere in tornado alley.) In the pocket -oh
yes! Ron's playing elevated my work ten fold. I'll let him go into specifics,
but by day I'm a lowly social worker and found his rates very reasonable.
I've got lots of other stuff that I want him to play on -wish I was an oil
tycoon! Thanks again all -very much appreciated.

 tried the demo yet. For some reason the timed demo's don't work=20
 =3D
&on
&my=3D20
& system. I just buy =
 it...except last=20
 time I got burned by the no=3D20
& =
 render
&bug...so I don't=20
 know what I'll do this=20
 =
 time.
