Hi All,=20

I figured I'd post a work in progress in case anyone finds it useful. =
It's
the pcomp with a mix knob. Dimitrios helped set me on the right track =
about
some design decision and took the time to try it for a while to make =
sure
it wasn't broken in some horrible way.

The mix knob blends in direct signal, and the comp. gain knob raises =
the
volume of the compressed signal in order to make up the gain, while =
leaving
the direct signal unaffected.

When I get some time, I'll do the mono version and try to add the same =
thing
to the two versions of NoLimit.

Cheers!

Mike
