I got excited until I noticed no ADAT sync capabilities. Doh.

- KI'm using the Project Mix I/o with M-Powered Pro Tools, and it works great
(make sure you get the right firewire card).

Thanks You can get past the 18 I/O limitation with the addition of the Music

Production Toolkit:

<http://www.digidesign.com/index.cfm?navid=115&langid=100 &itemid=4865>

You still will not have ADC for plugins though (which is the biggest knock against LE/M-powered).

David.

<http://www.mellowmuse.com/ATA.html>

Which brings up another point...

I'm wondering if we could convince mellowmuse to do a vst version of this for Paris..

Cheers,

TC

Ferrari

Cheap Italian crap

I feel your pain and embarrassmentHi Gary,

I got Quads, Solos and a Duo in stock.

The Flexi's we usually special order.

Email or call me directly for pricing.

I'm all out of the Ferrari's though.

Chris

ADK Pro Audio
(859) 635-5762
www.adkproaudio.com

chrisl@adkproaudio.comOk, I stupid (or ignorant - probably both), but I can't seem to find any info on any Monster Cable bass instrument cable worth \$250.00. The most expensive Monster Bass Instrument Cable was \$60.00 for 30 ft. Could it have been the Studio Pro 1000 instrument cable? Those float around the \$150.00 for a 21 ft length.

I only want to know so I can do a little more research on the subject - I'm a bass player (by choice), and would love to try something like you're describing here.

>Hi Gary,

This is the promo that got the extra \$150.00
<http://www.uaudio.com/promo/uad1/uad150.html>

They also just announced another \$50.00 coupon if used before 12/31/08.

This stuff basically amounts to a free plugin here or there. When it comes to UAD stuff that's something special.

I've ended up with the DBX 160 VU and Neve 88 RS channel strip. Maybe the Moog Multimode Filter and the Harrison 32 C to boot. I haven't tried these yet but if they're as good as all the others I am not worried. I'm also thinking about a cleaner mastering limiter to help my mixes out. NoLimit has it's limit.

The UAD stuff is killer for any DAW I should think.

I have to be careful with that pic - it's already sent one diabetic
into a coma :)

She's even worse "in person"; sure does light up the house. Seems to be
a perfect studio dog too, she slept between my feet for most of a five
or six hour session today, just nagging me to take a break now and then
(which is what I should be doing anyway).

Yep, as you observe, Christmas came a little early this year at our
place. An advance Merry Christmas to you and the family and pups too,
Deej.

I hadn't checked the price, that was what I thought I heard Warren say
(although I might have misunderstood). I just checked and it sure looks
like it was the Studio Pro 1000 to me, which is a more-modest but

still-hefty \$119.95. The bass cable is a surprisingly not-unreasonable \$44.95.

Norm just got off the phone from Keith Scott's tech in Toronto, who's going to make him three of his own custom directional cables and FEDEX them here for next week to try out - 2 x 15' and a 10'. He said he's AB'd his with the Monsters and likes his own better, and he says he'd be happy to make me some as well if I like them too. Norm should have them by next week and we'll shoot 'em out and start a new thread. I'm looking forward to seeing how much of the Monster hype is, as John suggests, just good basic EE.

- Ktry those 160VU's on bass man. I have the real thing here, and they are absolutely phenomenol on bass.

>Hi Kerry,

I have the Pro-Fire Light bridge and it's great!! Converters sounds really good. It also has a stereo outs and a headphone out for monitoring via analog. I use it for both my laptop and in the main studio adat linked to a Alesis HD24..which is hardwired to our 56 channel Soundcraft Ghost.

I love M-Audio audio units. They just work and they make really reliable drivers..

Looks like 15% off

http://proaudiotoys.com/index.php?manufacturers_id=26

<https://www.jrrshop.com/> Does anyone have the previous VST version 1.1 and has anyone tried using this

and happy with it???Unfortunately I'm in the middle of renovations and can't access Paris - hell

I have no idea where I put the damn rig anymore

hehehehe

Now for reasons best left untouched I am considering adding PT to my arsenal of goodies and of course I would host it on my second computer.

As I can't afford an HD rig, my options are limited to PT M-Powered, using the M-Audio Profire Lightbridge to fly audio between the computers.

Now as Kerry rightly pointed out there is no ADAT sync port on this puppy and according to M-Audio tech support Pro Tools M-Powered will recognise MTC for it's transport control.

Now for the dumb Q

Paris is supposedly able to generate MTC but where does it output as there are no midi ports in Paris?

Bottom line here is if I have to jump through too many hoops to integrate PT into my setup well Digi can go "F" themselvesHi Don,

You'll need a hardware midi device for Paris to output it to PT.
If you put PT in the same computer as Paris (do you dare?)
then MTC can stay inside the computer and route directly to it.
Maybe....

I've seen it done with Paris and Cubase. I'm planning on it here too.

Tom

in on the Lightbridge to facilitate clocking. Paris will generate MTC
from the timeline I believe (it's been a while) that PT could follow.

Getting the M-Audio interface would also allow you to integrate Cubase
at some point (more useful than PT IMHO) which would get you mixing with
full PDC.

David.

are you saying that MTC will be passed along the BNC cable?

I have Cubase2 / Nuendo2 / Reaper and Saw Studio on my second rig and they work flawlessly with my Dakota Card but but I'm trying to integrate PT into my setup but it looks like hoop jumping 101 will be on the agenda if I decide to proceed

No, separate cables... BNC for word clock sync, and a MIDI cable to transmit MTC for "position" information.

>

It won't be as bad as you think... just remember that there always has to be ONE clock master for everything. Do you have a separate word clock generator? You may want to invest in one... it will simplify things greatly.

David.

remember this lightbridge is supposed to replace the Dakota card which does
have midi in and out.

Are you suggesting the Dakota and Lightbridge can coexist on the same
computer and play nice together?

As I said this sync stuff is a mind fuck to me

Any midi interface should work with paris for MTC, I've used midisport
usb uno's and midiman interfaces, and other soundcard midi ports with
Paris over the years. You are just connecting midi cables to the midi
interfaces on each system for the MTC sync side of things.

With MTC, you are basically locking the position/transport of one daw so
it follows the positioning of the master daw, as David said.

The midi time code will sync the positioning/timelines, the wordclock
will sync the digital audio signals so you don't get clicks/pops etc.
with multiple digital devices.

Cheers,

TC

The Dakota should work also.

MTC internally from the ADAT sync send from Paris, The lightbridge doesn't
(as far as I know)

So now do I have to purchase something like a midisport to interface
between Paris and the Lightbridge?

>>My problem is not "not" understanding the basics, it's trying to put
together workarounds because Paris and the lightbridge do not have the same
digital i/o ports

Paris has SPDIF, wordclock ADAT sync and Toslink

Lightbridge has SPDIF, Wordclock Midi and Toslink

and from my understanding transport control is done via either SMPTE or MTC
and Paris can generate it but not output it directly

except via the SMPTE card - I think

> The Lightbridge has MIDI I/O on the supplied breakout cable.

You would get a MIDI interface for the Paris computer and connect from the MIDI OUT on the Paris computer to the MIDI IN on the Lightbridge. PT would see the MTC arriving at the Lightbridge and lock to it for "position" (via Midi Time Code). The word clock is required to keep all SAMPLES aligned so you don't get clicks and pops during transfer.

Once you have a MIDI interface connected to Paris, you can set the ports in the setup menu located in the project window.

PT will only see the M-Audio interface, where as Cubase et-all will see all the interfaces... you simply tell Cubase which ASIO driver to use and it will use the appropriate interface.

David.

So to clarify I'll need to purchase a MTC interface and a wordclock
generator as well as the lightbridge and PT
