I have a bin full of cabling salvaged from various projects and I'm going to be doing the Big Build sometime before Feb, so I'll likely be giving something like that a shot.

Holy snap! This is huge. I'll give it a try on my single core later, even though it won't tell us much about multicore puters; at least I'll be able to tell you if there are any unexpected effects.

Exxxxxxxxxxxxxxxxcellent!

- KHi Kerry,

Let me know if the new PSCL fixes your PARIS start-up issue, too. I had some weirdness from the last build. I think it was some weird compiler thing. I didn't really change anything except force it to rebuild everything, which it is supposed to do anyway, but I don't think it was.

Cheers!

Still no issues here! :)Anybody out there know where the best deal is on a Grace m101? I wouldn't normally be pinching pennies, but I've got a wedding coming up in August, so any gear is a stretch.

All the best,

MikeHey Mike and everyone buying music gear,

The Music Center in Kenosha, WI.
Tom Merrit is the man you want to talk to.
Best deals on almost everything.
800-697-9393

Tell him I sent you if you want to pay more.
Seriously, a fun guy who makes great deals happen.

Tom

> MikeA long time ago I was working at Washington Music Center in Maryland and I
bought some Monster mic cable w/ my employee discount. Even then it cost
something stupid like \$1.50/foot but I bit the bullet and bought 50 feet
of it to check out. I built two mic cables and a 10' guitar cable. It was
a major pain to work with because the individual strands were individually
insulated so soldering was a time consuming - I had to melt the insulation
off before the copper would take the solder. I took the 10' cable to my
gig that night. It was totally mind blowing! The difference was as dramatic
as changing strings after a long stretch. More highs, more lows, more dynamics.
So, being a glutton for punishment, I replaced every cable in my rig w/
Monster wire. I once had a friend with a EE degree explain at great length
that wire is wire but my ears tell me different. Since then I discovered
that the George L wire seems to sound just as good and is cheaper and easier
to work with. You might want to give that a try too...

>Mike,
First off,thanks for all your great work with PARIS. Is it possible to add
Rewire to PARIS? I know your work has been with the PARIS hardware,but if
there is anyway it would be awesome!
I know that Propellerhead has some sort of developers kit that they offer.
I can hope for a minute.

respect
Nappy

>Still no issues here! :)I'm an EE and your friend appears to be missing fundamentals. Cable capacitance

has a dramatic effect on what high frequencies get through among other parameters.

All wire is not the same. That's why for high quality video signals you need high quality cable with low capacitance so the high frequencies don't get lost.

There is no magic formula to cables but you do need good quality like canare, mogami etc. I buy my cables from haveinc.com cuz they are cheap and top quality canare.

If you hear differences then there are likely impedance mismatches or coloring from a cable that can't handle the frequencies.
