sounding PT mixes. So I can still use Paris whenever I like and I can experiment with a mix of the two styles.

What does all this mean? Nothing other than I understand why some people may prefer the way other systems sound and I think that my own preferences are biased by many years of listening to records made the old way. I don't see giving up Paris any time soon but I also don't think it's worth fighting over if someone else has different opinions on what sounds good.

day we will once again be "in".

GeneGene,

There's a whole gene

ere and there, my  
Cubase/Paris hybrid is exactly what I hoped Paris would eventually become.  
Just because Paris stopped doesn't mean we did. I think it's fun to put this  
stuff together and see what it can achieve.

;o)
