Bill crossed the line. Steve isn't perfect but he got my money for the
last two computers I bought.

Power is good, speed is good. Elegant design is good. Refined workflow
is good. Low support time is good.

I wouldn't want Gates taking over my company. There's a great Simpsons
scene where Microsoft "buys out" Homer's company. Classic.

Not sure I'd want to be bought out by Apple, either. I know a guy who
did that. Mixed feelings.

Cheers,

>Help,
I had a complete computer meltdown and am in the process of reconfiguring my new system. I have everything I need for running Paris 3.0 on XP, except I can't find my Paris 3.0 (I had it backed up on my second hard drive, which I lost along with my system drive when my computer melted down). I can't find the 3.0 CD anywhere.
Where can I download 3.0?
Thanks,
RonWhat ?????.....no meter bridge or fader automation. POS!!!!

but in the fact that the initial sounds are quite different from what's on
the record...

....IMHO.

If you get the sounds themselves matched better it will make it much easier.

If you can't match the sounds better, no amount of processing will help.

Just my 2 cents.

Cheers,
Kim.

>Hey DJ,

How come you're selling the Lucid? How much are you looking to get (not that I can afford it!).

By the way - Did I see that you're trying out an sE Titan?

>Gantt,

The reason I'm selling my CLKx6 is because I am clocking the RME hardware in my native DAW from the ADAT sync ports of my Paris rig. It's redundant and sorta silly to be using WC and ADAT sync to clock the same device (not to mention potentially confusing to the doubly clocked devices). If I need to go to higher sample rates, it's fairly simple to just daisy chain the RME cards and use the RME internal clock. The CLKx6 is just gathering dust right now. It's a cool distro amp if you need one. Street on these is around \$400.00 I think. My buy It Now is \$325.00. It's in "like new" condition.

>I'm trying to do the New York Drum Compression Trick where you squish one
mix of drums and let the raw channels just peek over the tops.

I'm in Paris and can't seem to squish enough. Every compressor I try (waves
C4,C1, RenComp, sonalksis, timeworks, Ultrafunk, blockfish, etc...) don't
seem to narrow the dynamic range much at all. They seem to drop the volume
as they narrow but with make up gain they sound very mildly compressed and
not all that impressive. I definitely understand compressors but anything
more than 3:1 seem to have artifacts.

Any serious squishing results in the kick distorting too. Here is a drum
track. Can anyone give me some tips please on getting the drumsound below?

<http://tinyurl.com/rpu78>

This is the sound I'm going for:
<http://tinyurl.com/gtacu>

Thanks in advance. Yes...Horacio "El Negro" Hernandez, Akira Jimbo (who does all that PLUS
plays
the total harmonic and melodic song structure on pads triggering all sorts
of bass and keyboard samples)
and Marco Minnemann. All very talented, freaks of nature. What's my prize??????

;-)

>So you're getting streaming errors?

Disk I/O should usually be higher rather than lower. Try 128 as a start point.

Personally I have:

Disk I/O =128
Disk Cache = 30 Meg
Overview Cache = 4096

It all depends on your system, how big it is (bigger needs higher numbers).
I have a two card system and those settings work fine for me. Don't remember the last disk error I had. Maybe none on this system. It's been said that your disk cache should allow for double the number of tracks that you're really using.

If you're on a single card system the setting may be ok, maybe... except I'd up the Disk I/O first to 128.

What is your system? How many cards?

Cheers,
Kim.

You get a cookie.

Wouldn't it be nice if you could show up at a gig with nothing but a
drum machine and a pedal? Much, much easier to carry and set up....

pabHi DJ, Does the CLKx6 only distribute WC and not generate it?

Thanks,

Gantt

>Kim--

thanks--

my system is antiquated-- about eight years old
with one card in a G3. i had similar issues when i
first began working with paris and the default configuration
and someone on this newsgroup, i think chuck duffy, gave me some
suggestions that ultimately cleared up the problem. at this point i'm
very nearly at the end of a lengthy project, ten songs with an average of
12 trks and a whole lot of submixes all of which
need final mixes, and suddenly my computer does not want to comply... a little
scary... the cursor stops midway through the tracks, the music continues
to play, and the only way to stop it is to force quit the program, and then
force the mac to restart.

i'll try your suggestions.
cheers back at ya

>A friend of mine ran across this review on Harmony Central while looking at
inexpensive basses for his son. I'm pretty sure it's satire, but funny none

the less.

Price Paid: US \$70

Features: 10

it was made in heaven forged by jesus christ himself because it is that ****ing good. this badboy has 24 frets all you need really, the controls of the king of bases is volumes controls and tones controls, this badboy is made of wood, but dont be fooled by the name wood, it should be called butter, no wood feels like rogue wood, no wood at all!

this thing is red, bright red, if you buy a

[View Forum Message](#) <> [Reply to Message](#)

a 5 string neck

it came with a box, a cardboard box

Sound: 10

all the choirs of heaven suck compared to the glorious rogue sound. i played musicmens and fenderses before i the day i laid eyes on my rogue a day that my life would be changed forever a day like any other day but a day that would mark me in a profound way and transform my base sound into the sound of gods. i just had to try it, it was brown, and it was red, and i had to have it, seeing that it was under 100\$ made me crap my pants in disbelief, after changing my pants i ordered it and upon arrival bore witness to a sound that no mortal man except those with 100\$ can bear witness to, the sound of a rogue, a sound that since my initial purchase will rock generations upon generations. of course when my band gets signed, were called "SERADED" and we are influenced by korn, limp bizkit, creed, kid rock, and sliiiiiiiiiipknot!!!!!!!!!!!!!! the sound is so good that my girlfriend RIP killed herself in order to never hear inferior base playing. that was a little extreme of her, most people cut off their ears to never hear an inferior bass again. others simply wait their whole lives to hear such glory again

Action, Fit, & Finish: 10

listen as hard it was to believe it was made in a factory not by jesus or the holy angels of heaven, it was made by rogue. whom i

believe to be a magical gnome with a fortress factory in korea, all that dare enter it shall die. it had no flaws, this is the perfect vessel for the base claff. the body was made of red and the neck, brown. nothing can beat such power. my hands moved so fast that they appeared to be in one location like lightspeed. everytime i play i yell lightspeed and everyones like "KILLER MAN!!!!!!!!!!!" and i play something so fast that they blink and cant see it happen. they however crap their pants due to the sound of the purest and greatest base ever. this base is flawless

Reliability/Durability: 10

i pulled out my 44 magnum and shot this bad boy, the bullet ricocheted off of it and left no mark, however the bullet killed every inferior musician and fender in the area. if i touched another base i would kill myself for betraying the rogue, im serious here people this thing is solid, ive heard of people eating them and digesting them without leaving a scratch, i took the polar plunge last winter while rocking out with it and the thing plays like butter still. the strap buttons are solid, who the hell makes liquid strap buttons. ive played this for the last 85 days, not taking any breaks, ive played it while eating and on the john, seriously i am playing it while typing this, that is how good it is, it hasnt worn out and ive been playing this bad boy for 2,040 hours straight and i play DEATH METAL LIKE KORN!!!!!!!!!!!!!!

Customer Support: N/A

why would i have to, it has a 30 day warranty, i have serious doubts that it was made by rogue, it may have been made by JESUS! and if thats the case i dont know where to find that guy for problems, all in all this badboy wont need repairs! ever! its that solid

Overall Rating: 10

This base is the best ever, im suprised musician and fender haven't sent out a press release saying "we make crap" or been investigated by the better business buereu for making crappy products. there is no comparison to this, the reason it is priced so low is because it was made by people who work for the love of it, people like rogue the magical tree elf of the woods. i keep mine in a steel case in a room, the room is located where i am now, there are thousands of landmines outside to protect it from theives, there is no chance of this being stolen or even touched by someone who is not me. i had 23 voodoo priests put curses on it against the theives. i carry a sword and 5 guns to ward off theives 5 men have been wounded by me for even looking at it funny. i love everything about it, it is bettter than a musician stinggay and a fender pee pee bass or a fender azz bass or a rickensucker or a gibson thunderturd, this is a rogue and nothing will stop it when it plays not even god

Original Link:

<http://www.harmony-central.com/Bass/Data4/Rogue/SX100B-1.htm> ISomeone really likes to make fun of John Petrucci. He is one of my personal favorites, but it's still cute stuff.

Thank you, and while we're being observant, I suspect the title of the other
two videos was supposed to be "Psycho Exercises" rather than "Phycho
Execises." But I shouldn't talk too loud . . . I found a couple dumb typos
in my CD's lyric booklet, including one of my own pet peeves . . . I used
"to" when I meant "too." Rrrrrr.

> Oh, don't get me wrong Aaron. I love Petrucci, and Satch, and Vai, and Morse, etc. and they all play very melodically. I'm in awe of their speed and would give my right arm to be able to play that fast. Of course, I'd then have to pick with my teeth, but I digress. ;>) Speed is great and like I said, I always get a big grin when I hear those guys shred. I guess what I'm saying is that the nature of playing super fast doesn't lend itself to relating deep emotion. It feels kind of one dimensional to me. Impressive to be sure, but the only emotion I feel is awe, and possibly jealousy. Ok, definitely jealousy!

It's funny though that Sarah mentioned David Gilmour in her next post, because that's who I was thinking of when I made the "three notes and make me cry" statement.

Anyway, I just wanted you to know

>>Hi Mates!

I own a PARIS System III & a Mac G4 DUAL 1.25Ghz MDD (Model: M8570) Machine.

My G4 only has 4 PCI Slots but the throughput is the best made on a G4.

I was considering putting my PARIS EDS-1000x Cards & RME-Audio HDSP 9652 Soundcard into an External PCI Expansion Chassis.

I was looking on eBay & found 2 basic types.

The Magma & The Avid.

I was wondering if you knew of the differences or what I should be considering.

I know that the PARIS Cards are the Slower 32Bit with slower Bit Depth & Mhz than the G4 itself.

I was wondering if you would recommend one over the other or

what factors to consider?

I wish to leave the remaining 3 PCI open in my G4 for Faster Cards.

What do you reckon - What would you guys recommend?

Donovan Jenkins

AustraliaNope, I've been using the Beringer B1 for well over a year now, on location shoots, (inside and out), and it sounds fantastic.

>I wouldn't buy a Behringer bag to hold crap in cuz it would just be full of

Behringer stuff. They are truly the crapfest of audio. Never has one company

had such a complete extensive line of crap. Amazing really.I'm coming to the opinion that the

EDS compressor can only mildly compress.

A number of people have agreed with me. Is this true? If not then squish

the crap out of this please and show me otherwise. Kill the dynamics so

the volume is very even and keep the sound.

<http://tinyurl.com/rpu78>

Thanks !!! Squishy good.Just make sure it comes with the cable!

Also, make sure it comes with the fan assembly. It blows air right down on to the PCI cards - perfect for EDS heat issues.

The Avid is ju

I think it was about an approach based on doing things in non-intuitive ways, or doing things in ways other guitarists don't, can't or won't - thus the anti guitarists.

IMO a lot of his style is based on weirded out rockabilly licks, but hey that's just me :-)

Also, I can't say enough about his playing on David Byrnes Nothing But Flowers :-)

Yeah,

Pennsylvania was a pretty long stretch.....but at least there is =
some variety to the terrain. what I found annoying about Pennsylvavnia =
was that apparently the highway department there assumes that everyone =
who is driving on the highways is familir with Pennsylvania. The =
interstate highway names change without any signs at these changes which =
tell you where the *new* highway goes. If you are driving on Interstate =
84W coming out of NY state, it just ends at Interstate 81 North or =
South. You have to know that interstate 81 N actually goes west and =
intersects Interstate 80 west or that interstate 81 south connects to =
Interstate 76 W, but if you're actually trying to find I70 West, there =
is no sign that says "Pittsburg.....this way" so that you know that =
this will happen. It's pretty easy to end up taking an unexpected detour =
through the Poconos (which ain't bad, but can be annoying if you aren't =
really wanting to do this. Also, the Interstates in Pennsylvania, NY and =
Ohio are under construction for long stretches. I was driving through =
Pennsylvania and NY on Friday and the construction delays really sucked. =
There were lost of commuters around Pittsburgh on Friday afternoon who =
were going postal. At one point, I sat stock still on I 76 for over an =
hour. The line of cars in front of me was so long that by the time =
traffic started moving again, what ever had been delaying things had =
totally disappeared without a trace. No way to know if it was a wreck of =
what.

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =

If you don't have any luck locally, Ed Stasium might be able to help locate someone.

<http://www.edstasium.com/>

Ed is from the NY, NJ area and is well connected. He helped me mic the kit on a drum session here a while back. He's well connected in the NY area I think.

Sorry, you lost me here. Set PARIS to post fader ?

Also, I don't have any VST plugs - do you know if Logic's proprietry plugs
exhibit the same behaviour regarding bit depth ?

Cheers,
Stewart.Hi Yasser

What is the physical configuration of your studio and your PARIS rig ?
That is, what sound sources are you plugging in, and what add-on cards do
you have for PARIS ?

Cheers,

Stewart.

>Hi Stewart.. I am running Both Paris and PT 002 Rack together on a 3800+ AMD 64.. Abit A8V 3rd eye..

a Yamaha 02R mixer..

2 KRK M 13000 B Mian Monitors

2 Yamaha NS10M nearfield

Signal Processing :

1- AL Audio 260 Compressor

2- Aphex C 4 Aural Exciter.

3- Behringer Denoiser 2000.

4- DBX DDP DIGITAL Compressor.

5- Bellari RP 520 Tube Pre Amp.

6 Bellari 583 Tube Compressor.

7- BSS 960 Equalizer.

Effects :

1- Lexicon JamMan.

2- Lexicon LX1.

3- Lexicon MPX 100.

4- Zoom 1201 .

5- Roland DEP 5.

6- Sigma (half Rack) by Fostex.

Media:

1- ADAT XT 20.

2- TASCAM MKIII Double Cassette.

3- Tascam DA88 HI 8 machine..

4- Tascam 45-HR DAT .

Paris:

1- One MEC (Black Face)

2- ADAT Card (not installed yet) have another for sale tho.

3- 4 I/O cards each is 8 plugs.

4- 4 EDS cards on a SBS 7 slots expansion chassis.

5- One Sync Crad :(((.

6- Authorised Paris Pro 3... which is only working through ANTIPACE now..

and thats another thing.. when I put the DEP_Paris (the ANTIPACED Icon) on desktop and try to open it from there it wont.. only openes from inside the Paris's folder in Programs Files..

That's it.. I have no additional cards.. you suggest any?

ALL of the above are connected via handmade patchbay..

MY MAJOR NEED IS TO KNOW.. which modules should I patch within the Paris's software.. so that I can patch it onto the O2R mixer (the internal Paris patching now)..

Thank you for your answering back Stewart..

ROTFLMAO!!!

We had that EXACT same experience! Decided to walk to the Hofbrauhaus
and the Hard Rock from the Trop. Didn't look that far.

You're right. I'm sure what we walked ended up being 376 miles.

And then we walked back. Guess we worked off the food and the
Frappaccinos at Starbucks.....

That's pretty much my take on it. As a technical dude there's nothing there.
As a musician I get it. Thus my comment earlier of nothing to see.

We are similar in that way, he and I, ironically. I've moved ahead though
into speed licks and blaze techniques in some ways, however being completely
self taught my methods are not normal, therefore I do things other 'learned'
players wouldn't, and vice versa. Added to that I'm a drummer, and think in
those terms of poly rhythmic and tonal techniques makes me an off the
normal path player.

Aaron,

You're saying you don't like the Windows XP firewall, but to use the =
Zone Alarm?

Thanks,
Jimmy

"Aaron Allen" <nospam@not_here.dude> wrote in message =
news:44a0c407@linux...

Definitely, dump norton first. You do not want two A/V's running at =
the same time.=20

Of my own personal machines, I use AVG free and of the half a dozen or =
so constantly connected to the net and running machines I have, how many =
viruses (including my personal 2003 MS server) have gotten through in =
the last 5+ years?=20

ZERO

Them's pretty good odds dude. AVG-Free has a nag message, but these =
are not corporate machines and I could care less that emails sent via =
outlook/outlook express have a "I use AVG" message at the bottom of =
them. It is otherwise completely non annoying.=20

My spyware is Windows Defender Beta II currently... again, no =
problems.=20

Zone Alarm has done what it's supposed to for years. I do not like the =
included window firewall, shut it off. Config ZA, don't just accept =
defaults. I also sit behind a hardware firewall/router. Anyone in their =
right mind that knows would, though.

For spam blocking, it's been a crap shoot, and no one has been 100% on =
that one. Can't recommend anything there as better than say 60% area. =
Outlook 2003 has some things built in, but nothing is perfect. Spam is =
definitely a layered defense item. Bug the heck out of your ISP/mail =
service to filter ahead for you. sign up for a hotmail account, and send =
any 'unknown' sign ups, internet stuff and otherwise guilty until proven =
innocent sources to that email address.=20

Never used Bit Defender, no opinions on it. Ditto on NOD32/ESET. =

Bottom line is AVG never ever let me down, nor a client's home machine, =
so I'm loathe to change a working plan of defense. I think Norton sucks, =
and I think McAfee sucks just slightly less, FWIW. Trend has been pretty =
strong from what I've seen in the corporate world. I use housecall to =
clear up messes NAI and Symantec left behind on infected machines, and =
this has been pretty consistent this entire year.=20

On another related topic that is for sure coming... boy, can I wait =
for the virus clowns to start attacking and infecting our phones and =
PDA's. As popular as the IPOD is, I'm just amazed some smart aleck kid =
in Taiwan hasn't found a way to infect it and pooch the =
library/licensing yet, either.=20

One thing at a time Aaron, one thing at a time.

-----=_NextPart_000_000C_01C69A26.64F991F0--Ok guys..I have these saved project files I am
trying to open and listen to,
but I can't hear squat.
I can create a new project and import an audio file and everything is fine.
I can hear it thru my card.
But I open one of the saved project files and I can see the individual channel
meters LEDs moving, but nothing on the stereo out meters. I have tried configuring
the VST Connections
and they look identical to the newly created project, but no go.
These were created on someone elses computer so I am thinking it is a config
issue, but I cant figure it out. All the tracks and plugs loaded up nicely,
but no SOUND thru the stereo outs.
ANY IDEAS?
Arg!!

Thanks
bMaybe the config details of your friends computer are different to yours.
Does he have a different sound card?

If so, the setup info that is transferred to your computer will not match yours.

Have you selected your soundcard in the VST connections window?

I selected the EMU ASIO driver in the Device Setup/VST Multitrack.

EMU is my new EMU0404 sound card.

In the VST Connections / outputs tab.....it only gives

me two options for output. ASIO 1 OUT & ASIO 2 OUT.

In the Input tab it lets me select all 8 of the inputs if I want.(that are associated with this card).

Each individual channel was not assigned a bus!!!!!!!
Everything that was assigned to a sub bus like an fx bus was set, but the
fx busses were not assigned an output bus and anything that was sent directly
from the channel to the stereo out was not assigned an output.
ARG!!!
Thank you so much for your help!!!!

 either/or.Have you read the setup manual for the card?
 Set it for the Cubase settings, From memory here...That's how I remember
 initial setting it up, actually, I think there are a few presets setup for
 the card in the software.

>any way of getting a VU meter on the paris master inserts (anyone want to build a VU meter for Paris!?). Kinda desperate to have access to a VU meter for mixing. I don't have (and can't afford) a hardware one (unless they're really cheap!).

My only other thought was that I could perhaps I could take the out from paris and run it into another computer or another soundcard on the same computer and use an app just for VU metering. In which case, what app could run a VU meter plug in (e.g. the PSP one) on a live input - ideally one that doesn't use too many resources?

Thanks

Dan

>Hi,

I'm attempting to set individual channel levels to +2db on a VU meter when the channel is solod and the fader is cranked to +10. Unfortunately the only VU plug in I have is native and so can only work on the inserts. Which means I can't use an EDS comp to set the gain since they're post native inserts. And the channel fader won't have any effect either. Still, figure I could insert a native plug to control the gain before the VU meter plug. Any idea what plug in I could use to do this without introducing artefacts and without introducing unnecessary load on the CPU.

I could use Waves L2, though that will have artefacts (not necessarily a bad thing) and increase CPU load.

Thanks for any thoughts.

DanTry a C1 with 1:1 compression

Do a simple google search and you will get one free without any cpu resource
drawback !
