Look, folks, our current leaders for the most part suck. They don't even know that was solves nothing. That's about as lame as a leader can be. I have read that, other than Paul and Obama, every one of the candidates voted to invade Iraq.

if we spent our abundant national energies and resources exporting (selling fairly, not giving) our technologies, tractors, cars, science and most of all, our art, we would be loved around the world once again as we once were.

-Mac ibook..Very bad on-board usb and firewire support

-m-audio fast track ..Look, M-audio maks some of thee best Windows drivers..Can't say that about it's Mac driver support

Solution: Seel the imac, and get a Mac Book pro..NOt and Mac Book, but the Mac Book Pro...2) Use either a Motu or RMe interface.. They both have the best driver support for the Mac platform..

you have to read more sources, Bill!

At least one of the candidates proudly voted against the Iraq war at every opportunity.

Of course, no candidate with such unorthodox views has a chance in a zillion.

-steve the ever-more jaded.

story of the day (ok, of yesterday):

<http://www.guardian.co.uk/pakistan/Story/0,,2188777,00.html>HI Mike,

Which version of Cubase SE?

Some versions aren't compatible with 10.4.10

If it s the version based on Cubase 3/4 engine then it should be

Also as Lamont says . Don't expect ,much out of the Fast Track either.

You might want to try some other program demo to see if they work Maybe there is something wrong with the computer.

function from the MIDI menu, then in the dialog select "Separate Pitches".
This will create a new midi track for each pitch (in the case of midi drums,
each drum).

That's the way it's setup in Nuendo 4 at least, but should be similar if not
the same in SX3.

I'm glad to hear there is one more person of sense in Washington. I think many politicians are good people. Unfortunately they are the ones who seem to have a hard time raising money and getting support from the media.
