I'm upgrading an existing box... a 4U rackmount.

I appreciate the advice. Thanks!

David.

Well unless the boxes guts are really old we can easily just do a parts upgrade.  
We do that all the time for our customers.  
Kinda funny upgrading a dual/dual core Opteron to a single quad core Intel. :)

Chris

>Mac to PC users,

If you spend half as much on a new PC as a new Mac you guys will end up with a smoking PC/Paris/Cubase (insert any DAW) rig. For this scenario I suggest Chris Ludwig all the way. You won't have to learn anything and it will be a mofo comp out of the box.

OTOH you can build your own, dig around for older parts and learn all the ins/outs of PC building and save lots of money. The time is more important to me these days.

I've built more than a few comps myself but think the knowledge that Chris imparts into your rig is worth every penny not to mention the lifetime support and supplied backup software.

Sincerely,  
Tom

>Hi Guys,

I can share my experience a bit. First of all, my objective was to keep things bone simple, and use the pc only for paris (I've got 2 mac pro's that will be integrated with it, so I didn't need anything fancy).

My other thought was to go single core Athlon, also to keep things simple. I ended up going on ebay and grabbing a bare bones system consisting of atx case, mobo and cpu, with 1gb of ram.

Specs were:

CPU AMD Athlon 64 LE-1640 AM2 (2.7GHz) 45W 2000MHz FSB

Memory 1 Kingston DDR2 PC2-6400 1GB/800MHz

Motherboard BIOSTAR MCP6P-M2 (NVIDIA GF6150,SATAII,RAID,DDR2-800)

Video NVIDIA GeForce 6150 GPU Memory Share Up to 512MB

Audio Onboard High Definition Audio

Network Card Onboard Network Card

Case G-Power Stylish Deluxe Black Case (9021)

Power Supply 450W ATX Power Supply

These were all brand new parts. Cost was \$144.00. Now, this system only has 2 pci slots and one pcie, so I am using a pcie-pci expansion chassis with 4 eds cards (virtuavia).

I added my own hard drives that were kicking around, and a (new) dual pci video card also from ebay for around \$60 (there's onboard vga, but that only powers one display).

I just temporarily borrowed the cd rom drive from my mac to install windows xp. I installed the stripped down version of XP, but I have an xp pro license here as well for it (I always like to do things legit as everyone deserves to make a living from their hard work).

That's it. very inexpensive, brand new parts and runs great so far. Very easy to get up and running with paris, and far beyond the systems I've used with Paris in the past. In my opinion, keep it for paris only and keep it dirt simple.

If you need something to run cubase and paris etc, and need anything beyond the basics, then get someone like Chris L to build it for you and save the headaches.

Cheers,

TC

Disclaimer: this isn't Mac vs PC advocacy. I should be clear about this once again - I'm a PARIS Mac user from way back myself, and my main work/production computer, the one I'm typing this on right now, is a dual G5. This is to help folks who are interested in making that transition in 2008/2009 to compile the info they'll need to guide them in that transition.

- KHi Guys,

I can share my experience a bit. First of all, my objective was to keep things bone simple, and use the pc only for paris (I've got 2 mac pro's that will be integrated with it, so I didn't need anything fancy).

My other thought was to go single core Athlon, also to keep things simple. I ended up going on ebay and grabbing a bare bones system consisting of atx case, mobo and cpu, with 1gb of ram.

Specs were:

CPU AMD Athlon 64 LE-1640 AM2 (2.7GHz) 45W 2000MHz FSB

Memory 1 Kingston DDR2 PC2-6400 1GB/800MHz

Motherboard BIOSTAR MCP6P-M2 (NVIDIA GF6150,SATAII,RAID,DDR2-800)

Video NVIDIA GeForce 6150 GPU Memory Share Up to 512MB

Audio Onboard High Definition Audio

Network Card Onboard Network Card

Case G-Power Stylish Deluxe Black Case (9021)

Power Supply 450W ATX Power Supply

These were all brand new parts. Cost was \$144.00. Now, this system only has 2 pci slots and one pcie, so I am using a pcie-pci expansion chassis with 4 eds cards (virtuavia).

I added my own hard drives that were kicking around, and a (new) dual pci video card also from ebay for around \$60 (there's onboard vga, but that only powers one display).

I just temporarily borrowed the cd rom drive from my mac to install windows xp. I installed the stripped down version of XP, but I have an xp pro license here as well for it (I always like to do things legit as everyone deserves to make a living from their hard work).

That's it. very inexpensive, brand new parts and runs great so far. Very easy to get up and running with paris, and far beyond the systems I've used with Paris in the past. In my opinion, keep it for paris only and keep it dirt simple.

If you need something to run cubase and paris etc, and need anything beyond the basics, then get someone like Chris L to build it for you and save the headaches.

>Hi All,

I've just past a really important milestone. In order to make the Scherzo thread-safe, I had to replace the circular arrays used by the original Scherzo with special Microsoft defined linked lists. I figured that would be the hardest part. It didn't turn out to be all that hard. I was just afraid of it because I had never worked with anything like the Microsoft linked lists.

Anyway, I'm playing audio on a new build that uses the linked lists. :)

The next step is moving the functionality of the delayed procedure call into the ISR and placing the ISR spinlock around the functions that change the IRQ masks.

We're making progress.

Mikel just put this text into Babblefish and I still can't understand it... ;-)

Everyone repeat after me.... We're not worthy!

David.

We need to get 12 tunes x 30 tracks out of CuBase (3) as wave files. All edits must be preserved, but no EQ/Pan/Gain/Processing etc can accompany the tracks.

What is the easiest way to export files from CuBase?

Logic has "Export all tracks as audio files". Is there something similar in CuBase?

Appreciate the help

TedWe're not worthy... but man, I'm sure happy Mike's on the case!

able to develop practical methods of writing music and lyrics and recording

lots of great drum sounds and a good ear for jazz and latin drums, but I  
lack either the right software or the right approach. Although I occasionally

chorus, etc.

Many thanks in advance for any tips or suggestions you may have.

Best wishes,

Richard FaylorBy "edits must be preserved" do mean that you want all the little  
segments, or a single full length file per track?

David.

Well, to explain this better...

There is a block of code that runs every time a piece of hardware interrupts Windows to say "Hey, I'm ready for more data!" Microsoft has put severe restrictions on that code because if anything goes wrong with it, the whole computer crashes.

One of the restrictions is that you can't use the tools that you would usually use to allow code to run on more than one CPU at once. They left one, single type of list that you can use that is safe in a multiple CPU environment - and I guess everyone just uses it. It's really weird to me, but it works just fine.

So, to make a long story short, I had to replace all the code that stores the info sent between the cards and the PARIS app with this new kind of list. I just finished removing all of the old list code, and PARIS is still running fine. :)

I've been so swamped teaching that I haven't been able to work on this for two months. My report cards went in last week, so Sunday I spent 3 hours, and I've spent a few hours tonight. It's moving fast.

Although it costs around \$30 or so...it has worked flawlessly for me when pulling files from Cubase as WAV file / individual tracks.

Mike.

That sounds really great. Now we're talking about the Scherzo drivers not the whole Paris app right? What benefit will this give us when

you get it ready for prime time? Will this eliminate some of the multicore hurdles we have to jump now?

I am totally ready for whatever it is you can do for us and will gladly pay you for your service.

Thankfully yours,  
Tom

Geez, with all the work it looks like you've done, wouldn't it  
be easier just to write a new DAW app that works with the Paris  
hardware & incorporates your plugins? lol

NeilHi, Aaron. Thanks for the tips on bus mastering mode. Unfortunately, my PARIS  
rig is still dead in the water.

I haven't heard of the Official Paris list you speak of. Tell me more...

I appreciate your response. I was unable to find any references to NOIDE in the registry.

If all else fails, I may try a total reload of the operating system and PARIS 3.0.

Does ID still issue codes to unlock 3.0 when you install a new system?

Thanks.

Bob H.

>Best wishes,

>Richard Faylor

>Heya Richard; concepts in drum programming have progressed by leaps and bounds since OS9 was discontinued. After multi-layered samples (so different velocities triggered different samples) proved insufficient for realism, the hippest drum sequencing plugins moved to techniques like "alternate strokes" where even two consecutive snares at the same velocity trigger different R hand and L hand samples, and multiple samples for each stroke so you can "mix" your drums for more "room" or capture bleed from one in the mics of the others.

Drum programs also started to add sequencer components with included performance libraries of MIDI patterns. Most of the stuff requires a reasonably fast computer and OSX. Things that might interest you would include:

FXPansion's BFD <http://www.fxansion.com/index.php?page=1>

XLNAudio's "Addictive Drums" <http://www.xlnaudio.com/>

For percussion, Wizoo's "Latigo", a killer Latin percussion sequencer <http://www.soundonsound.com/sos/jun05/articles/wizoo.htm>

It might be worth your while to consider booting into OSX to do your drum programming in order to take advantage of the possibilities these packages offer, many of them undreamed-of in the days of OS9 - and for what a single drum sample CD used to cost.

Regards,  
Kerry, Annette and Jack.  
-----19751660231335584115--Hey Kerry,

Sorry to hear that.. that's always a tough one.

Cheers,

TC

Rob Arsenault wrote:

> Wow, what a great site Graham, lots of great audio info, thanks.  
> RobJust wanted to say hi to everyone. Some of you may remember me from a few years ago. I decided to go into a NEVE/SSL/PT studio deal with some friends and that's still working out well. I never got rid of my PARIS stuff, but it just hasn't been getting used so I posted it in the for sale section. I might end up hanging onto to some of it, we'll see.

I'm glad to see PARIS is still alive and this community is still happening; it's a cool system and there's great people here. I'll check in occasionally and see what's up.

peace,

Pete Ruthenburg

[www.musiccreekstudios.com](http://www.musiccreekstudios.com) Very easy to do. And quick. Create "parts" for all your audio files, and

drag the beginning of each part to the beginning of the project. Then select your tracks and "bounce" (not export) your tracks. In the dialog that comes up, tell Cubase to replace your files with the new ones. Your old files won't be gone, they just won't show up as active in your project, and will be placed in the Trash for you to decide what to do with them. If you erase the files in the trash from your hard drive, you'll only be left with the rendered files in the project's audio folder. If you'd rather not be so destructive, open the project audio folder in Explorer, and sort the files by date/time. That way you can easily see the rendered files, select them, and copy them to an alternate folder.

Thanks gang. Sorry for the OT "pity party"; was just feeling kinda low.

- KOnly Dog People can know that dogs are people too. I'm sorry for your loss...

I'm sincerely sorry to hear this. I'm glad you had those fifteen years.  
DeejThanks David. I'll pass this along. It's for my brother, who is switching mixing engineers on his wife's CD.

Thanks Deej. I knew you'd get it. Last week she was walking in the park with us and chasing sticks at the lake and enjoying life like any Lab. Couple of days later she'd just lost the will to be here any more. Never a single whimper of complaint, nor any sign of pain or distress - just swiftly weaker over about four days until she couldn't stand up any more. When she lost interest in eating or drinking and couldn't hold her head up for long I knew it was coming soon.

Yesterday I carried her outside on a quilt to sleep in the sun for an hour or two, and she summoned up the energy for about five paces and a round of wags. It wore her out completely. And I would have cheerfully kept carrying her up and down the stairs to go outside for as long as she had no pain and wanted to stick around, but she was saying "thanks - it's been lots of fun, but now it's my time".

Hope she's out on that beach right now.

- K

I've got a big lump in my throat and a tear in my eye right now. I've been there and will be there agains soon. Our two danes just turned six. I know

what's ahead. It sounds like you gave her a great life and the help she needed to make it to that beach. Good for you Kerry. She's a lucky girl.

DeejHow can I inport new patch bay setup in old Project? Can I save all patch bay setups somewhere?  
Thanks

GoranOw. Sorry man. I got a 16 year old kitty . . . dreading the day.  
Condolences.

S

getting up there in years too. It  
saddens me to think of the loss. But the memories will survive and there is  
always a new pup to begin a new friendship.

Rich

Hey John; according to one chart she was 93 in human years. That's the west coast of Vancouver Island - Chesterman Beach in Tofino, just south of the Wickaninnish Inn and looking south toward Frank Island. We went there at least once pretty much every year; if you do Google Earth, try

- Knice area. we made it as far as the Juan de fuca trail at China Beach. Awesome island ! Had a blast renting scooters and zooming around. And I love the buffet on the ferry !

JohnThey used to have a killer clam chowder on the ferry, then White Spot took it over...

David.

Heh. I grew up riding those ferries in the 60s and 70s; the clam chowder was a part of my childhood, as was the Cream Of Celery soup, which we called "Ferry Soup".

- KDitto... I grew up in Deep Cove North Van, the Grandparents lived in Sidney, so I spent a \*lot\* of time on those ferries!

David.

Hey Kerry -

Thanks for posting. We had to put our dog Zippy down this past August. He was 14 and a bit. He was the largest Sheltie anyone's seen, and his father was grand national champion purchased by a Japanese outfit for stud. He had a calm demeanor (not big on yappy dogs) and a stout heart. He once stared down a pit bull from around the corner. If they had gotten into it, he wouldn't have lasted of course, but he showed up...

We still have his great nephew, Duncan, and his name is present in our business Zip The Dog Inc

My wife and our 2 kids all went to the vet's. Very very sad.

Take care,

Ted

Kerry-

it's posts like yours and the comments following it that keep me coming back  
here after all these years.

one of my saddest days was taking my mon's 15 year old cat on a one way trip  
to the vet.

sincerest condolences for you and your family. those photos are great.

-stavel don't have the manual in front of me right now but if I remember correctly  
you have two areas to the right, one on top of the other that hold local  
patchbays and global (for all projects). There are arrows at the top that  
move the stored patchbays left and right from the local to the main window  
with all the modules and there are buttons to move patchbays up and down  
from local to global. There should also be buttons to save / open to and  
from a file. You can open these files in any project and easily go back

and forth from project to project with your patchbays. Awesome looking Sheltie !

Corrupted Default Project 'unhandled exception: c0000005 at address: 00481382'

'Paris has caused an error in Paris.exe'

1. Delete or move the offending default project file out of the Paris directory.
2. Deinstall Paris.
3. Go to the windows system folder and
  - a. delete the directory that says Ensoniq if present

- b. delete the file Paris\_StudioControlLibrary.dll if present
- c. Reinstall Paris
- 4. Start with one card.
- 5. If necessary, go to plain vanilla sytem, meaning ALL cards removed except for video and 1-EDS. Once that is working, start adding others one at a time until all is working.

I am not suspecting your card swapping for the moment because it sounds like the hardware initialized, but then could not open the default\_project.ppj.

This makes me think it was a corrupted ppj file, or other corrupted Paris components. Hence the above advice.

Some things to make note of:

- 1. Did Paris work initially with your new advancesys scsi card or did it stop working immediately after you installed the new card?
  - 2. If you remove the advancesys and put everything else back where it was before, does it all work fine? (you may need to force a PnP update via your bios)
- Goran,

When saving always right click. It will save your modules too!  
Save to disk on the little pull down menu up top in a folder of your choosing.  
Load from that folder into other projects.

Tom

We have an all white small (4.5lbs) cat named Lilly. She had developed a scab on her ear that grew to be the size of a large marble. It would heal then she'd scratch, then it would open up and blood would be everywhere. This went on for months. Very messy and sad. She was diagnosed with cancer. She began to break down and couldn't jump anymore. We brought her

to the vet who said she should be put down. I didn't concur.

We brought her home, her scab eventually healed because she learned to stop scratching it on her own. My wife heard that beets are good for cancer. We mix beet juice with chicken broth and that has made some kind of difference it seems. Now she is full of piss and vinegar with only little tiny scabs on both ears. No biggy.

We're so glad we didn't put her down when it was suggested. Four months later, no signs of any pains and she jumps, runs and plays like our other three cats.

Even if she failed tomorrow the last four months have been awesome for everyone involved. Just ask Lilly.

Respectfully,  
Tom

I have a usb mouse, keyboard and midi patchbay.  
These all need a 25'-40' run. I also plan to eventually  
run 4 DVI about the same distance.

These are the products I'm looking at for usb:  
<http://www.tigerdirect.com/applications/SearchTools/item-details.asp?EdpNo=2893288&CatId=444>

or if that won't be stable, this is lots more money:  
[http://www.gefen.com/kvm/dproduct.jsp?prod\\_id=2218](http://www.gefen.com/kvm/dproduct.jsp?prod_id=2218)

These are the long run DVI products:  
<http://www.tigerdirect.com/applications/SearchTools/item-details.asp?EdpNo=2815509&CatId=79>

or:  
<http://www.tigerdirect.com/applications/SearchTools/item-details.asp?EdpNo=1643055&CatId=1163>

I was hoping for a less expensive alternative. My existing USB extension (\$30) is suspect. I lose my midi patchbay within Cubase at least once in an 4-8 hour session. Often times the computer locks up too.

Any other ideas folks?  
TomOne other thing I might mention is that a friend had her DVDs going bad after repeated cleanings with Windex and/or alcohol - no scratches, but they no longer read.

on startup.

I don't have a multiple card sys, so this may be useless(!) but I'm thinking  
of any windows (editor, mixer , etc) that might open up for that card from  
the default ppj

Not sure what you're using right now. I use these.

[http://reviews.cnet.com/networking-and-wi-fi/bafo-usb-2-0/45\\_05-3243\\_7-30613791.html](http://reviews.cnet.com/networking-and-wi-fi/bafo-usb-2-0/45_05-3243_7-30613791.html)

I've never had a problem with them. I have daisy chained 2 of them along

with a 15' USB2.0 non active extender and it worked fine to get a Frontier Alphatrack happening about 45 feet from my computer in my tracking area.

DeejHey Deej,

That looks similar to what I've been using with less success. Maybe mine isn't USB 2.0? I bought it about one year ago. I'll have to check. Maybe that's the problem.

Maybe my problems aren't USB related but wireless USB key/mouse related?

Thanks,  
Tom

1) I'm agreeing with you that the PARIS app is probably not corrupt as I was able to return everything to a working state simply by reconnecting that second EDS.

2) I don't have any AdvanceSys SCSI card... AGP video card, 2xEDS, 1 UAD card.

3) I did try removing the UAD card with just the one EDS and it still wouldn't work.

If I remove the second EDS (keeping EDS and UAD) should I force the BIOS update? could that be my problem? Not sure how to do that, but I bet I can find it in the BIOS...

and then to Kerr...

could be! Now that I have both cards in, how do I create a ppj to only look for one card? I've been away from PARIS for some time so I'm a bit rusty...

thanks!

>To create a ppj with only one card, I would think it would be enough to make  
sure you only have one submix created (and assigned to the card you're going  
to keep), and then if you have any other windows open, they should  
automatically be assigned to that submix (and therefore the kept card),  
although it might be worth shutting all windows anyway.

I think if you save that as your default ppj, it might do the trick.

if not, you could consider stripping it back further and getting rid of any  
patchbay settings, etc.

best of luck,

Kerr

>Hi David,

I think that's what I'm using here now with my Midi Patchbay. Maybe the mistake I am making is using only one repeater then a regular USB cable attached to that. I'll get another and see if that doesn't solve my problem.

I read that USB 2.0 shouldn't work with repeaters. Everyone says it does though.

Good info!

Doesn't say.. are you 'sure' these are USB 2.0 and are they using TCP ethernet or just using that connector (RJ45) type? I might also question latency on these, since you're talking about running a hardware app through them that is definitely sensitive to that kind of problem.

>

> or if that won't be stable, this is lots more money:

Same thing as above... check compliance and latency specs. I would say this to 'any' device you insert in your path.

Less expensive usually means more hassle I've found. Consider what is your time worth, and base your decisions on taking chances or not. Only you know that answer bro :)

1/4 \*MILE\* !! We have a 1/2 mile deep and about 3/4 mile wide facility.  
Old habits, talking audio, typing that connector... duh...  
I can reach the pre and routing stage with Soundweb, however the amps  
require a slightly different method so I'm improvising. It's all going to be  
CDi or XTi, and every building will be a Venue on the main network if I have  
my way about it.

>>My girlfriend rescued (the momma dog had the pups and some loser dumped the whole lot in her backyard, but she just couldn't turn them over to the pound.....) an entire family of dogs last January/February in the middle of that really nasty ice storm that took down the whole city for weeks. One of the little fuzzy guys attached himself to me immediately as we shifted them back and forth from whoever had the warmest house and time to take care of them. He slept a lot (which is how he got the name Crash), and the worms almost got him before I could get him treated. He could fit literally in my hand and hardly hang over the edges.

I kept him. As he was recovering he stayed right next to me even making the trek to work a few times. We had FEMA onsite, and we're the jumping off position for all the power outages that were being dealt with for the region, so needless to say timing for adding a new fur baby was not exactly good. Just as we were coming out of that and into the next busy season here for my workplace, apparantly some stray came up in the yard and pissed his Parvo all over it, and almost took little dude out again. He's over all that now, but to point the vet told me basically to expect to lose him. 2 blood transfusions and many, many dollars later he's a fine and healthy young man getting ready for his 1st birthday. I don't know what I'd do without him now. I included the rest of the fuzzy kids. Each one of them a blessing. Flynn in the last pic had cancer also, and I had to have his eye removed. He still quite alive and quite full of the aforementioned piss and vinegar, and definitely my most aggressive protector.

Their not always right, are they Tom? Glad you didn't go that route and it all worked out as hoped.

Heard it, not impressed at all. Alice Cooper does better work in 3 months.  
17 years and 13 million dollars....hilarious. Zeppelin was recorded in  
2 weeks and mixed in 2 days....just a bit of perspective

JohnWell, in the 4 years or so since I last used Paris I've completely forgotten  
the install routine for XP. Must be Oldtimers Disease.

Could some kind soul direct me to the instructions?

When I try to install, it extracts files for a moment and then nothing. XP  
SP2.

thanks!

Mikel think the instructions are up at <http://www.parisfaqs.com/parisonxp.html>  
Built any sweet mics lately?

AA

No, no new gear projects lately. I decided to dust off the old Paris rig  
this morning and went immediately to computer hell!  
Thanks for the pointer to the instructions!

Mike <http://www.kfocus.com/paris>  
setup / xp setup.....

run the setup app to install the scherzo drivers, reboot, then install Paris,  
reboot, then the effects subsystem, then reboot.

musicxp.com tips

Processor Scheduling for Background Services  
Visual Effects for best performance  
Switch Off Desktop Background Image  
Disable Screen Saver  
Disable Fast User Switching  
Switch Off Power Schemes  
Switch Off Hibernation

Disable Remote Desktop  
Disable Internet Synchronise Time  
Disable Hide Inactive Icons  
Disable Automatic Desktop Cleanup Wizard  
Disable NTFS Last Access Time Logging (NTFS Only)  
Disable Notification Area Balloon Tips  
Disable CDROM Autoplay  
Disable Disc Indexing

-----  
Additional tips  
-----

2 audio Partitions  
Use NTFS drives with 64k clusters  
In BIOS disable USB, LPT1, Serial port  
Remove Messenger  
Classic Mode  
Classic Start Menu  
Power Schemes: you can have the monitor turn off but set Turn Hard Drives off to NEVER  
Disable the Computer Browser in Services to improve mapped drive browsing.  
Disable your network card by right clicking on the nic icon  
Defrag regularly  
Keep your desktop clean  
No wallpapers  
Set video to highest color depth  
Increase your IRQ priority  
Disable Power Management  
Set graphic acceleration to full  
Disable background applications  
Disable USB  
Graphical window settings  
Disable NTFS Last Access Time Logging (NTFS Only)  
Make sure DMA mode is enabled on drives

Restart your machine at this point in time. When you come back the first thing you should do is defrag the main drive even if it doesn't say it needs it. This way the swap file has been truly set and you're ready to continue.

-----  
Processor scheduling should be set to background services and not Programs.  
Start > Settings > Control Panel > System > Advanced > Performance Settings  
> Advanced Tab > Background Services

Advanced tab: Press Settings tab under Performance Visual Effects tab: set to Adjust for Best Performance.

Switch Off Desktop Background Image

Right Click Desktop > Properties > Desktop Tab > Background None

Click on the Screen Saver tab, Set Screensaver to None, Press the Power button near the bottom

Disable Fast User Switching

Start > Settings > Control Panel > User Accounts > Change the way users log on or off > Untick Use Fast User Switching

Switch Off Power Schemes

Start > Settings > Control Panel > Power Options > Always On > Turn off monitor and turn off hard discs to Never

Switch Off Hibernation

Start > Settings > Control Panel > Power Options > Hibernate > Untick Hibernation

Disable System Sounds

Start > Settings > Control Panel > Sounds and Audio Devices > Sounds Tab > Sound Scheme to None.

Do Not Map Through Soundcard

Start > Settings > Control Panel > Sounds and Audio Devices > Hardware Tab > (highlight your soundcard from the list) > Properties > Audio Devices > (highlight your soundcard from the list) > Properties, and check the "Do not map through this device" checkbox.

Disable System Restore

Start > Settings > Control Panel > System > System Restore Tab. Tick the "Turn off System Restore on all Drives"

Disable Automatic Updates

Switch off Automatic Updates by going to Control Panel, System, Automatic Updates and ticking the box labelled "Turn off automatic updating. I want to update my computer manually."

Startup and Recovery Options

Right click My Computer and click on Properties > Advanced > Start Up & Recovery Settings and uncheck "Automatically Restart".

Disable Error Reporting

Start > Settings > Control Panel > System > Advanced TAB > Error Reporting > Click the Disable Error Reporting box (Tick the "But Notify Me When Critical Errors Occur" if you prefer)

### Disable Remote Assistance

Start > Settings > Control Panel > System > Remote > Untick "Allow Remote Assistance Invitations to be sent from this computer"

### Disable Remote Desktop

Start > Settings > Control Panel > System > Remote > Untick "Allow users to connect remotely to this computer"

### Fixed Swap File (Virtual Memory)

Select the Advanced tab of the Systems applet and then select the Performance settings button. Then select the Advanced page. In here it is possible to customise the Virtual Memory. For custom size, this is often recommended to be 1.5 to 2 times the amount of your total RAM for both initial and maximum size. Set this to a fixed minimum and maximum value according to your existing RAM

### Speed Up Menus

You can use this tip to speed up the Start Menu in Windows XP. You can customize the speed of the Start Menu by editing a Registry Key. Click Start, and then click Run. Type Regedit in the box, and then click OK. Expand the menu in the left panel and select the HKEY\_CURRENT\_USER\Control Panel\Desktop folder. Scroll down in the right panel and double click on the MenuShowDelay file. In the Value Data box, change to default value for the menu speed from 400 to a lesser number, such as 1. Click OK.

### Disable Offline Files

Start > Settings > Control Panel > Folder Options > Offline Files > Untick "Enable Offline Files"

### Disable Internet Synchronise Time

Start > Settings > Control Panel > Date and Time > Internet Time > Untick "Automatically synchronize with an internet time server"

### Disable Hide Inactive Icons

Start > Settings > Taskbar and Start Menu > Taskbar TAB > Uncheck "Hide Inactive Icons"

### Disable Automatic Desktop Cleanup Wizard

Start > Settings > Control Panel > Display > Desktop > Customise Desktop > Untick "Run Desktop Cleanup Wizard every 60 days"

### Disable NTFS Last Access Time Logging (NTFS Only)

Start > Run > regedit > HKEY\_LOCAL\_MACHINE > SYSTEM > CURRENTCONTROLSET > CONTROL > FILESYSTEM Add a new DWORD value - "NtfsDisableLastAccessUpdate" (without quotes) and set the value to 1. Then reboot to make changes effective

### Disable Notification Area Balloon Tips

Click Start , click Run , type regedit , and then press ENTER.

HKEY\_CURRENT\_USER\Software\Microsoft\Windows\

CurrentVersion\Explorer\Advanced Right-click the right pane, create a new DWORD value, and then name it EnableBalloonTips . Double-click this new entry, and then give it a hexadecimal value of 0 . Quit Registry Editor. Log off Windows, and then log back on.

-----  
Disable CDROM Autoplay

One of the very important (and well documented) tweaks in Windows 98SE, was to disable CDROM autoplay (auto insert notification). Disabling CDROM autoplay no longer offers a significant performance benefit in Windows XP, and therefore you do not need to disable it. Just don't insert a CD during a crucial recording.

However, if you really want to disable it then here a few different methods.

Method 1

Start > Run > Regedit

HKEY\_LOCAL\_MACHINE\System\CurrentControlSet\Services\Cdrom

Set autorun to 0.

Method 2

Open My Computer Right Click on each CDROM and choose Properties Click on the Auto Play tab In the drop down box you can choose the Action for each choice shown in the drop down box

Method 3

Go to Start->Run->gpedit.msc Computer Config -> Administrative Template -> System Double click Turn off Autoplay Enable it.

-----  
Disable Disc Indexing

Indexing Service is a service that extracts the information from a set of documents and organizes it in a way that makes it quick and easy to access that information through the Windows XP Search function, the Indexing Service query form, or a Web browser.

This information can include text from within a document, (its contents), and the characteristics and parameters of the document, (its properties), such as the author's name. Once the index is created, you can search, or query the index for documents that contain key words, phrases, or properties.

-----  
Additional tips Descriptions  
-----

Partitioning. A useful tip when configuring your audio disc, is to split this into two partitions. Set up a smaller "audio scratch" partition - say 6GB of a 30GB hard disc. This partition will be used for the songs that you are currently working on. The benefit of a smaller partition is obviously quicker defragmentation. If you use the entire 30GB as one partition, then this will take ages to defragment. When you are finished with a song, transfer the audio files to the non-scratch partition, where disc I/O performance isn't so critical.

Messenger starts up at the windows load up but we can get rid of that in no time at all..

Start Menu>Run

Type this in exactly as it is here:

RunDll32 advpack.dll,LaunchINFSection %windir%\INF\msmsgs.inf,BLC.Remove

Hit Enter...you will see a DOS-like shell appear and disappear very quickly and then it will ask you to restart.

Right-click on your desktop, and then click Properties.

Click on Themes tab

Set Themes to Windows Classic

Also do this for the Start Menu:

Right-click the Start button, and then click Properties.

Click Classic Start menu.

Click the Customize button to select items to display on the Start menu.

By default, selecting the Classic Start menu also adds the My Documents, My Computer, My Network Places, and Internet Explorer icons to your desktop.

-----  
Increase your IRQ priority - You can increase the IRQ priority of the real-time CMOS clock to gain some system performance by doing the following:

1.) First create a text file with the extension .reg

2.) Paste the following into the file:

REGEDIT4

```
[HKEY_LOCAL_MACHINE\System\CurrentControlSet\Control\PriorityControl]
"IRQ8Priority"=dword:00000001
```

3.) Double-click on the file to enter the tweak into your registry.

This can be un-installed should you need to by repeating the three steps above with a new file, except this time use the following in your .reg file:

```
[HKEY_LOCAL_MACHINE\System\CurrentControlSet\Control\PriorityControl]
```

"IRQ8Priority"=dword:00000000  
-----

On" and set "System Standby", "Turn off hard disks" and "Turn off monitor" to "Never".

Set graphic acceleration to full - You can do this by going to your desktop, right clicking and clicking on "Properties" then on "Settings", "Advanced" and the "Performance" tab. Make sure the Hardware Acceleration slider is set to "full" to reduce the load on your CPU.

Disable background applications - Background applications start up when your computer starts up and can use up unnecessary resources. To prevent these

on the "startup tab" and disable (uncheck) programs such as "taskmon", "load power profile", "real player", "office startup", "winamp agent" and so on. Keep programs like "scan registry", "system tray" and programs relating to interfacing with your audio card (such as console software to control its features).

Disable USB - If you do not have any devices actively using USB in your system (this includes dongles for your software), disable USB as it is known to sometimes cause problems in certain DAW configurations. Not only will this help to increase system performance, but it will also free up an IRQ. Right click on your "My Computer" icon on your desktop and select "Properties". Click on the "Device Manager" tab and scroll down until you see the USB section. Click on the "Properties" for the USB device and check off "Disable in this Hardware Profile". You will have to reboot for these settings to take effect.

on the "View" tab. Under "Visual settings" check off "Show window contents while dragging". This is more of a usability tweak, as it will allow you to see the contents of windows on the screen as you drag them around (instead of them going blank).

Disable NTFS Last Access Time Logging (NTFS Only), Start > Run > regedit > HKEY\_LOCAL\_MACHINE > SYSTEM > CURRENTCONTROLSET > CONTROL > FILESYSTEM

Add a new DWORD value - "NtfsDisableLastAccessUpdate" (without quotes) and set the value to 1. Then reboot to make changes effective. I haven't heard the album but I heard a couple clips that I actually thought sounded really good (the song "Better" or whatever it is), and read some lyrics that were also well written. It also seems to be cinematic in aspiration, which is something I like.

Compared to the current state of rock music, the G n'R clips I heard sounded fresh (ironically) and has some passion. I really can't stand the corporate rock shit that is out there today, it makes my skin crawl- which is why I haven't been able to listen to much new rock in the last few years, and usually gravitate towards electronica and acid jazz or Radiohead or old Faith no More albums.

I think I may actually pick it up though.. maybe I'm just intrigued from the hype.

Cheers,

TC

Anyone ever experienced this?Hey... fixed it!

I tried all sorts of stuff with the PPJ and patch bay configs... ended up with this:

Years ago I had modified the PARIS executable for a cooler skin. I put back the original PARIS.exe and it works like a charm!

Thanks for all the help... now I gotta figure out how to get that skin back... only kidding!

>I vaguely remembered something about SP2 and data execution problems with the installer for Paris...

Try this:

Windowskey + Pause/Break key

Advanced Tab

Performance -> Data Execution Prevention tab

Add the Paris EXE file and set for \*turn on DEP for all programs and services except those I select\*

Does it run now? If not, I'd look at possible corruption of your installer or a 3rd party issue.. like say, Norton/Symantec.

Johnwell, because, our CD was, after all recorded and mixed entirely in PARIS. Anyway . . . see "holiday specials" blurb on the general page.

Thanks,

SWe've had mixed success with the XTi... lots of failures. Also, the DSP is after the input level controls, so the noise floor of the DSP (which is substantial) can't be attenuated.

David.

>Most of what we're using it for is not musical production, it's paging in  
buildings/barns so it works out fine for that. The CDi-1000 is the model  
most used at this point. I've seen some failures here on that but it's  
mainly due to being subjected to a nasty environment and heat. The K1's and  
K2's have been pretty solid, but have no USB control. They're getting up  
there in age though, so what would you recommend as a replacement there that  
has USB interface feedback and control? Those are mostly in our main  
pavilion and are a music production setting. (  
<http://www.exposquare.com/es/facilities/pavilion.asp> )

The XTi I've had personal experience with using it for my live band, and  
it's been pretty bullet proof so far. But then again, a noisy club wouldn't  
show much noise floor issue really.

It's good to know though that they have that issue so I won't try to use  
them in a more critical environment.

Magma IRQs are a big part of the setup for me.  
I know you are on top of this like a, ... well, whatever.

If it's easy enough to find can you post that here for me and others again?  
I'll be using the older PCI style Magma with 5 EDS and maybe the Creamware  
Pro if it likes being there. Maybe the Creamware card will be happier  
directly in the computer though? 3 PCI and 3 PCIe available.

I am inches away from implementing the largest/fastest Paris/Cubase system  
I've ever dreamed about.

I'll keep everyone posted throughout the process.

Thanks,  
TomI did find out that the opening verse of Street of Dreams cleared out my constipation  
tough. Trying singing it. You'll clear right up!!;-)

Still haven't picked it up and actually heard the cd yet, so you may be correct.

As for your constipation problem, I prefer a nice bowl of Fiber 1 for that task.. thanks for sharing though..

Cheers,

TC

John wrote:

> I did find out that the opening verse of Street of Dreams cleared out my constipation > tough. Trying singing it. You'll clear right up!!! actually really, really like it. It wasn't what I expected at all. But, the more I listen to it, the more it grows on me. I'm not defending 17 years and 13 million, but I'm glad it finally came out.

It sounds like a solo album. You can tell it's all one writer. But, I've missed production on rock albums. It just seems like everything I've heard lately has been done fast and cheap with nothing much interesting about it. This album has interesting layers and sounds. The best part is that I don't think the layering and the production have reduced the emotion conveyed, as can happen.

In my car, the vocals sound like they were mixed too low and the snare sounds a bit too loud, but they both sound fine on my beloved NS10s.

Hey, maybe it will spark a trend of spending more money on recording. :)

All the best,

MikeCool, I'm going to go buy it then. I like big production, and layers and emotion and attitude.

What I can't stand is contrived slop that's geared to radio, with lyrics that seem like they were written by a 12 year old.. (which is most of the rock out there today).

That's what made "Appetite" so brilliant, and Nirvana's "Nevermind", and Soundgarden, and Faith no More.. it was all emotional rock music that wasn't contrived, or at least didn't come off that way to me..

I seriously can't listen to radio today, it makes me barf..

Cheers,

TC

Tom,

What mobo? If you are using the the same as mine, here's my skinny.....

Q9450 CPU OC'ed to 3.2GHz;  
Gigabyte GA-EP35-DS3 mobo  
PNY Quadro graphics card (Nvidia driver);  
4G RAM

SSL Duende PCIe

UAD-2 Quad

Magma x 13 PCI > PCI w/ 4 x UAD-1 cards

Magma x 13 PCIe > PCI w/ RME Multiface, RME MADI, and RME AES 32

Cubase 4.5x

The devices/drivers are configured as follows:

PCIe\_1: OPEN

PCIe \_16\_1: PNY Quadro-IRQ 16 & 17

PCIe\_2: Pro Tools Branded 13 slot Magma PCI chassis hosting RME Multiface, MADI and AES32 PCI cards in slots 1, 5 and 7, interfacing the mobo PCIe slot using a Magma PEHIFX1 host card. All cards share IRQ 18

PCIe\_3: UAD-2-IRQ 17

PCIe\_16\_2: Duende PCIe-IRQ 16

PCI\_1: Pro Tools Branded 13 slot Magma PCI chassis hosting 4 x UAD-1 cards in slots 1, 5, 7 and 11-All cards share IRQ 20

PCI\_2: OPEN

If you are only using one 13 x slot Magma, you can be relatively certain that slots 2 and 4 will share an IRQ and it will not be the same IRQ that is shared by slots 1, 5, 7 and 11.

The onboard LAN shares IRQ 17 with no ill effects. there are no FW devices on this machine and it is disabled in the BIOS.

Hope this helps:

DeejThanks Deej,

Sounds like we have about the same box.

I have the same mobo but mine says GA-EP35-ES3P

When counting slots in the Magma are you going left to right looking at the front of the chassis? My power supply is in the right rear corner. The Magma card sits on the far left.

I should think it will work the same as yours. I'll have to get those long ribbons made for Paris to sit in slots so far apart. Magma host card can go in PCI 1 on mobo. I'll have five cards so maybe 1 EDS can take the other IRQ from slot 4, the other four can share 1, 5, 7, 11. Creamware can sit in the computer on PCI slot 2. The UAD-2 is installed in PCIe 2 right now.

Sound good to you?

Thanks for all your info in this world. It will save me weeks I should think.

Happy,  
Tom

Same as mine.

>  
> I should think it will work the same as yours. I'll have  
> to get those long ribbons made for Paris to sit in slots

>so far apart.

I think I've got a set of the xtra long ones here that I got custom made from Morgan a few years ago if you need them.

>Magma host card can go in PCI 1 on mobo.

This will work but will force anything that is interfacing with PCI slot 2 to share with the same IRQ that PCIe\_16\_1 uses which is your video card.....may be a problem, maybe not. If you've got a Magma that uses the round SCSI style cable, I'd strongly recommend that you get the Magma PEHIFX1 host card.

>I'll have five cards so maybe 1 EDS can  
>take the other IRQ from slot 4, the other four can share  
>1, 5, 7, 11.

This will probably work. If your Magma has uses the flat cable I think your 4 x bus sharing slots will be 1, 4, 8 and 12. You'll just have to swap them around until you find what works if you're using more than 4 cards.

>Creamware can sit in the computer on PCI  
>slot 2.

If your Magma is interfacing with the PCI slot #1, this will almost certainly force your Creamware card to share with the IRQ that your PCIe\_16\_1 slot (video card) is sharing (and may also create a scenarion wherein your CW card is also sharing an IRQ with the EDS card in slot #4 of your Magma)...at least that was my experience. Whether or not that will be a show stopper, I don't know. My Duende and my UAD-2 are sharing this IRQ with the video card slot with no real issues, but they are all PCIe devices. Not sure how it will work with PCI and PCIe sharing but I have found this mobo to be pretty forgiving using ACPI.

>The UAD-2 is installed in PCIe 2 right now.

>Sound good to you?

That's the slot I'm using for my Magma PCIe host card so I can't say.

>

>Thanks for all your info in this world. It will save me weeks

>I should think.

My # is 970-769-0488. Give me a call if you hit a snag. Maybe I can help.

;)
DeejHi Deej,

I'd love to snag those EDS ribbons from you. How many can you spare and do you also have the clock cables? Tell me what you need for them and shipping. Any long ADAT cables floating around?

My Magma cable is the flat type so 1, 4, 8 & 12 it seems for me.

If I use PCI slot 2 will that throw the Magma assignments off?

I was thinking that the PCI bus may deal more easily with the Creamware card if it wasn't in the Magma with 5 EDS guys. The UAD-2 sharing with video sounds great if it isn't a problem for you. My video card only uses one IRQ anyway.

Here's what I have with only the UAD-2 installed in PCIe 1x #2 with the 16x Video card also.

PCI 1-9 = either not shown or one thing is on each

PCI 11 = Wide Open

PCI 15 = Wide Open

IRQ 16 = NVidia GeForce 8600GT

Intel(R) ICH9 Family PCI Express Root Port 1 - 2940

Intel(R) ICH9 Family PCI Express Root Port 5 - 2948

Intel(R) ICH9 Family USB Universal Host Controller - 2937

Intel(R) G33/G31/P35 Express Chipset PCI Express Root Port -

29C1

IRQ 17 = Intel(R) ICH9 Family PCI Express Root Port 2 - 2942

Intel(R) ICH9 Family PCI Express Root Port 6 - 294A

Realtek Gigabit Ethernet NIC

Universal Audio UAD-2 Duo DSP card

IRQ 18 = USB Universal Host Controller

USB Universal Host Controller

USB Enhanced Host Controller

IRQ 19 = SATA Raid Controller

USB Host Controller

IRQ 20 = wide open

IRQ 21 = USB Host Controller

IRQ 22 = wide open

IRQ 23 = USB Host Controller

Enhanced USB Host Controller

Where would you start?

I'm getting all excited about IRQs. Oh man.  
Tom

I've got BNC and ADAT cables out the wazoo. Way more than I'll ever use again. Let's talk by phone over the weekend and figure out what you need vs what I have here.

>  
>My Magma cable is the flat type so 1, 4, 8 & 12 it seems for me.  
>

OK then. You're gonna have to go PCI.

>If I use PCI slot 2 will that throw the Magma assignments off?

Maybe. It may not create any issues on that particular mobo though. Lots of available bandwidth. The question would be withether or not you will have enough bandwidth on the PCI bus itself if the CW and EDS cards are sharing IRQ.

>  
>I was thinking that the PCI bus may deal more easily with the Creamware  
>card if it wasn't in the Magma with 5 EDS guys.

If you're going with 5 x EDS cards, one of these will end up on a different IRQ from the other 4. If that IRQ shares with the PCI2 slot, then you may have a trainwreck. I just don't know what to tell you at this point.

The UAD-2 sharing with  
>video  
>sounds great if it isn't a problem for you. My video card only uses one  
IRQ  
>anyway.  
>

You're gonna be good there.

this looks like my assignment situation.

>  
>Where would you start?

You know me better than to ask that.  
;)

>  
>I'm getting all excited about IRQs. Oh man.  
>Tom

It's going to be a trial and error situation, but I'd bet that you will succeed.  
That's a very forgiving mobo. Another option you have would be to buy a second  
(newer) Magma PCI chassis and a PCIe host card for it. If you go to EBay,  
be doubly sure to inquire as to whether or not it uses the round cable to  
connect the host cards. the older model with the flat cable won't accept  
a PCIe host interface.

BTW....I was doing some checking and found this.....very rare to see  
one of these.

[http://cgi.ebay.com/AVID-Digidesign-PCI-Expansion-chassis-cable\\_W0QQcmdZViewItemQQ\\_trkparmsZ66Q3a2Q7c65Q3a3Q7c39Q3a1Q7c240Q3a1318QQ\\_trksidZp3286Q2ec0Q2em14QQhashZitem350130429927QQitemZ350130429927QQptZKeyboardsQ5fMIDIQQsalenotsupported](http://cgi.ebay.com/AVID-Digidesign-PCI-Expansion-chassis-cable_W0QQcmdZViewItemQQ_trkparmsZ66Q3a2Q7c65Q3a3Q7c39Q3a1Q7c240Q3a1318QQ_trksidZp3286Q2ec0Q2em14QQhashZitem350130429927QQitemZ350130429927QQptZKeyboardsQ5fMIDIQQsalenotsupported)

Cheers,

DeejHey Deej,

I'll call you over the weekend and work through some of this. I will need about 6 x 6'+ adat cables. I suspect at least three long sync cables and five of the fatter ribbons. I don't need WC though.

I'm not really worried about the PCI bus since Paris was designed to work under those conditions. The Creamware card should be as isolated from the Paris IRQ trainwreck as possible. Brian sure had his way with Paris. I should think I'll get it to work.

I'm having no problems with 4 EDS, and a UAD-1 in a 5 slot machine now. I lucked out. So that's all it takes I guess!

I'm ready to do this. Failure is not an option.

Thanks for your help,  
Tom

>Hi all,

I am new to the newsgroup and am having some problems with Paris. The following error comes up: "An error occurred during playback. The data could not be read fast enough from disk. Try adjusting the system playback parameters, or use a faster drive." Every time I try adjusting the disk cache size and overview cache size and go back into Paris, it locks the computer. This happens in both 2.2 and 3.0 versions. Any idea to why this might be happening? I'd really appreciate some help on this. I'm trying to meet a deadline on a recording.

Take care,

John Solinski  
www.johnsolinski.comJohn,

Don't know how much help I can give, but first a couple questions:

- 1 How many tracks are you running
- 2 What kind of drive are you using?
- 3 How much RAM are you working with.
- 4 What settings are you using for disk cache and overview cache.

It's a starting point.

Jeff

I'll add a very important one - what OS are you using? If you're on a PC, this is the wiki entry on it so far -

<http://www.kerrygalloway.com/WikiPARIS/wikka.php?wakka=DataNotFast>

On the other hand, if you're on Mac - although my Mac OS9 days are long behind me I seem to recall that if you assign memory \*inside\* PARIS (ie in the config window) you need to also add memory to the PARIS app - do it by quitting, selecting the app, doing "get info" and upping the memory allocation to the app in the resulting window. Not doing this can cause lockups even if you have lots of RAM, because the config is basically telling the app to use more RAM than the OS has assigned to it. Also don't assign it too much of your physical memory - leave lots of unassigned RAM for normal OS operations plus any VST plugs you're using (if I recall, their RAM usage isn't part of the PARIS allocation).

- KOK, what you've got is contagious; now I've got it too, on a previously flawless PARIS install after a reboot. Weird. Investigating further.

Nah, this box is 100% firewalled from the net; good thought though.

- KOk, i know i said it sucks but really it does.... hehe  
I hope i never hear the album again. There's not one song  
I even remotely liked enough to listen to again. (/me turns up Johnny and  
Edgar Winter / They only come out at night).

01 Chinese Democracy.mp3

1 minute of wasted time for ambient effect  
Alice Cooper sound but not as good, pretty good guitar sound though.  
Good vocals and guitar solo

02 Shackler's Revenge.mp3  
sounds like a bad movie soundtrack ripoff intro  
guitar is totally annoying  
lift/pre-chorus is more conventional  
chorus is skanky vocal  
basic headbanger guitar with obligatory sol

03 Better.mp3  
sounds like a britney spears crap song intro  
opens into a straight ahead rocker with typical crappy vocals  
then goes to headbanger break and back to basic rocking  
key change at 2:24 that makes NO musical sense  
back to headbanger mode ( at least he's not singing)  
damn, he started screaming again.....really bad too  
really bad splice at 3:25  
back to straight ahead rock with actually decent harmonies till he sings  
again  
ends like some gay britney spears song

04 Street of Dreams.mp3  
pretty ballad that gets ruined by his vocal  
his vocal is SO bad that I can't think of any song I've ever heard this  
bad  
replace the vocal with Ann Wilson and you have a nice song with orchestration  
even  
though the guitar is very boring and could use making some musical statements

05 If The World.mp3  
sounds like a movie soundtrack song and the vocal is probably the best on  
the album  
but it sounds like a GIRL ! hahaha The vocal bends are pretty bad though.

06 There Was A Time.mp3  
god this intro sucks and it doesn't get much better  
I went and played some RUSH YYZ and realized how REALLY bad this is. haha  
Nice wah guitar solo though that builds nicely till he sings and ruins it.

07 Catcher In The Rye.mp3  
Sounds like an Aerosmith / Bon Jovi song. Straight ahead medium tempo rocker.  
Nice key change. Unfortunately the sections of the song don't really fit  
together.  
The song was so boring to me I tuned it out and forgot it was playing.  
Is there a story? What the hell is it about ? Who cares !  
Plenty of guitar drivel noodling at the end.

08 Scraped.mp3

Skank o rama, can you bang your head ? Good ! you'll love this.  
That boy can't sing on pitch to save his life.

09 Riad N' The Bedouins.mp3

intro sounds like your stereo broke. Cool guitar intro goes into  
speed metal mode has some wicked guitar chops but the vocals suck as usual.

10 Sorry.mp3

pink floydish wanna be song but very simple and horrid vocals as usual.  
very nice guitar solo  
Instead, go play Pink Floyd Animals

11 I.R.S..mp3

Sounds like classic GnR. If you like them, you'll love this.  
Great drum sound.

12 Madagascar.mp3

starts off like royalty, turns to movie soundtrack drum machine and  
is very boring and then gets ruined with Martin Luther King narration  
Who the hell wants to hear a narration on an album you will listen to  
over and over ?

13 This I Love.mp3

How can anyone like these vocals? It's just beyond me. Let Michael Jackson  
sing it and show you what this song could be.

14 Prostitute.mp3

god i hate those cheesy drum machine sounds.  
sorry, i'm not big on orchestration in rock music except for maybe  
Kiss in Australia DVD. That one rocked.Hi Kerry,

I'm home sick with a cold today. Give me a call if I can help.

All the best,

Mike

>I had my old friend Norm Fisher over yesterday, we were shooting out  
bass DIs for his rig. We shot out three Radials (JDI, J48, a  
BassBone), my trusty Demeter VTBP-201 and a Bare Knuckle Audio handmade  
"black box". We decided the JDI was the way to go (the Demeter was the  
fave but it was just for reference, he's not looking for a rackmount;  
we'd already shot out the REDDI previously, but although it sounds  
killer soloed we love what the Demeter does to bass in the track) since

it made his Sadowsky and vintage P the happiest.

And then Warren, my tenant (the tenant who just happens to be a music editor, an engineer and an ex-Fodera luthier for good measure) brings up a \$250 Monster bass patch cord he was given as a gift. We laughed, knowing it was all hype - a decent cable (which we were already using) is a decent cable, right?

Wrong. We weren't laughing after putting it through its paces. Holy snap, the difference between the Monster cable and the regular (good-quality) cable was every bit as profound as the difference between DIs. Less harsh highs, rounder lows, tighter bottom. It's supposedly a "one way" cable, and honestly we couldn't hear a scrap of difference between directions - but the raw sound was \*definitely\* the surprise of the day.

Norm is Bryan Adams' bassist, and his tech keeps threatening to build him "Monster-quality" patch cables, so next step we get a few of those puppies built and shoot them out against the Monster (I ain't payin' no \$250 to a pack of Cayman Island IP rapists if I can help it).

Eeeenteresting.

- Klif you feed it directly into this you'll have multiple orgasms.

If I can get through a few listens without crashing, I'll post a beta.

So far, I've started it several times with no "Tom's Hardware" utility, and the C16 seems fine.

I moved the code that copies data to and from the cards into the interrupt service routine, which should resolve the threadsafety issues. I wasn't able to move some notification code into the ISR, though. The code lets the app know that some data has been sent or received by the Scherzo. Microsoft doesn't allow setting events in an ISR. This matters because I won't be able to create as tight a buffering system as I had hoped for a low latency ASIO driver. It's just the way it is, I guess.

I'll let you know how this goes.

All the best,

MikeThis is a multi-part message in MIME format.

Well, here's my first real stab at it.

Seems to work well here on my quad core Phenom 9350.

I slowed down the start-up timing a bit when I was troubleshooting my new PC a while ago. I'm pretty sure I can tighten them back up. But for now, it works.

Here's the install steps for the brave. :)

the PARIS\_StudioControlLibrary.dll goes in the Windows\System32 folder. be sure to back up the copy your using currently just in case.

The Scherzo.sys goes in Windows\System32\drivers\. Be sure to back up your current scherzo, too.

Restart, and unless I've just been lucky, you'll have PARIS on a multicore

with no special workarounds.

Let me know how it goes.

Cheers!

Mike
