polyphonic.

Celemony melodyne does the same.

I don't think you can do it at this point. maybe when the new melodyne is released ?that should do it because it breaks down chords into the individual notes, but you will still have to discern which note is the guitar and which note is the clarinet.

Id say to use your ears and a pencil and paper at this point.

r />

i'm already getting #ucked up the ass by the corp leaders who get paid 100's of millions of dollars to mismanage a company into the ground so what's a few more bucks spent to insure that my granddaughter and her children also have the opportunity to get the same @ucking? of all the things to complain about spending money on, i find their future as the absolute least objectionable. so i say, lets not spend it on the same old bullshit and spend it on something wothwhile...our...their future. we've spent trillions on how to destroy the planet, how about we spend some to..at the least...help it. i don't think that's a waste of money.

how about instead of the check box for donating money for a political party on the 1040 we have donate to alternative energy funding? or

stop fathers from @ucking their daughters? or parents from killing their kids? you know, something useful rather than getting joe/debbie whoever getting elected to do nothing but bitch about joe/debbie whoever doing whatever they do and doing nothing but worrying about getting reelected...now that's a @ucking waste of our money.

god, am i redundant or what???
