That's the way I understood his question anyway.
He could run OSX on the DP machine, but the performance might not be great
on an older G4.

Anyway, I like the 828 MkII Firewire interface. The pre amps are pretty
clean and they have a decent amount of gain available. Actually, the 828 is
my "no color" pre amp right now. I've got 16 channels of Trident ixOne, an
HHB Fat Man II, and an Aphex 107, but they all are pretty "colorful" pres.
Until I can afford a Great River, Gracie, True Systems, etc., the 828 will
cover things.

MOTU's new UltraLite interface looks pretty nice also.

>Hi Tony,

Yes, you're right - My thought is to run Paris on my new DP 1.25 GHz G4 in OS 9.2.2 and Digital Performer on my old 833 MHz G4. I'm hoping to be able to use the Waves IR-L reverb and some of the UAD-1 plugins (like the Neve EQ!!!) in real time. Is the latency of the 828 MkII low enough to pull that off? I figure there'll be issues w/ the UAD-1 FX, since the card has its own latency issues. I can't understand how DJ manages to make it all work in real time on his system!

Thanks,

Gantt

Have you been doing any crossfades?

I would bet on your paris.cfg file needing optimizing.
C:\program files\ensoniq\paris\paris.cfg

This is what mine is set to:

*** PARIS Configuration ***

*** ENGINE configuration parameters ***

* Cache Size in MB

CacheSize=128

* Overview cache size in KB

OvwCacheSize=8192

* I/O configuration

IOSize=256

* SubMix Cache Size in KB

SubMixCacheSize=256

ManualRecDelay=4096

RecXFadeLen=20
Use32BitWinMTC=0

DisableDirectX=0

MasterOutputCard=0

ScrubMaxRate=1

WheelSensitivity=20

WheelInertia=68

CSProVersion=ABCDEFGH

VSTDDirectory=C:\lvsts\

MIDIPlayDisabled=1Also,

Try resetting the record path to a new empty folder.
Or if you are on the Mac and running anything before OS 9 you may have run out of open files (MacOS limit). If this is the case try clearing unused files from the audio window.

ject Error in setting direction. Error code
>1879048261/70000045 mean?
> Just started showing up when
>during recording session. I'm running on a G4- 9.2.2
> Please help! Thanks, Greg Owhat is the proper configuration for the little eds cables for a 3 card
system??

thanks.

jerYou should be able to search in Outlook Express, but in any case it's pretty
much beyond my ability to control. Once you have the posts on your NNTP client,
it's up to the client to search the posts. I'm pretty sure Outlook Express
can do it though, but if you can't, don't be afraid to switch to web mode
to search. The web search works on my server.

As for your actual question, this diagram may help. It's the 4 card version,
but hopefully you can see the pettern and revert back to three cards...

I actually went to Full Sail in Orlando to get a degree in recording engineering back in 88 when studios still had large format consoles and 2" 24 track tape decks. That's what I learned on which is why I got into Paris. Loved the analogish sound and console like GUI. Full Sail changed quite a bit during the 90's. They started cranking out graduates and expanding into all kinds of areas that have nothing to do with a recording studio. In any case, I eventually went back to school to get a 4 year engineering degree and a real job.

I'd love to have a Paris get together one of these days. Just let me know where and when and I'll make it if at all possible.

peace,
T.Rossi

"Tom Bruhl" <arpeggio@comcast.net> wrote in message [news:44ea6f87@linux...](#)

T.,

Ya, I graduated in '79 in performance. Guitar was my major but I played some alto too. I really liked the writing classes with Herb Pomeroy, Mike Gibbs and Phil Wilson. I had Ralph Moore from the Tonight Show Band in my senior recital band. Those were the days when Berklee had one 8 track studio only. I only had a few classes in there. That was not important to me at the time. They had just built the Performance Center.

I spent a few summers in Champagne/Urbana at the jazz camps at U of I. Very cool college town down there. If you're ever heading towards the Cape or RI, feel free to stop in. It'd be great to meet another Paris user. I met Ben Atkins a year

Bad day.

I choose Polesoft Lockspam to fight spam, and you?
<http://www.polesoft.com/refer.html>He was a great drummer and one of my favorites. I met him a few times he was a real nice guy. I asked him why he no longer played with the Knack, He told me that Doug Figer, Attorney Jeffery Figer's brother, had cheated him out of the money. He felt that he wrote the signature drum parts, some of the song parts and that he should have been compensated fairly. They cut him out, he had no royalties, he was never paid any residuals, and they replaced him. Doug Figer ask him to come back to play with the Knack several times. Bruce said he would come back if Doug would Pay him fairly for his contribution to the Knack and acknowledgment for contributing to the song writing, Doug refused. Bruce told me that he didn't think that he would be playing with the knack ever again.

I'm sad to hear about Bruce's passing.
