>>>get deeper into the video(15 minutes), you start seeing some really
>>>powerful
>>>editing stuff.
>>>
>>>This new Elastic Audio feature will replace their Beat-Detective feature
>>>which was already a powerful tool for Drum editing..
>>
>I know about Iommi... he has two first-joint prosthesis' - he
was the first guy I thought of, of course. That's a different
hand, though, the fretting hand doesn't have to apply much
pressure - in fact, the less pressure, the better.. helps you
to play smoother/faster - and certainly no lateral pressure (as
in holding a pick securely. Rick Allen/whole different thing...
he overcame that with technology to some extent, and re-learning
his playing patterns to another - which I may have to do, but
obviously in a different manner. Believe me, I'm not
saying "that's it, I give up", I'm just looking for someone
else who I might be able to ask (I don't think Tony Iommi would
chat me up) about what kind of finger prosthesis they have,
where it's attached, & what it's capable of doing in terms of
both pressure & dexterity. I know nothing about this, so I'm
just trying to get some info from a musical users' standpoint.

Neil

David,

I can get it to boot fine with one mec. Once I add another
(I've tried two and two cables) it shuts down. This is just the=20
scsi cable no power on on the Mecs. The Magma will not power up.
It starts then stops right away. It's like it's seeing a short.

Would you agree the 400 watt power supply is all done?

I'm wondering if I scorched something in the Magma too?

Any ideas?

Tom

> All types of Audio PostHi Neil,

No personal similar experiences to relate, but just in thinking about it, it seems that for maximum control and sensation post-surgery, you would want to preserve the bone.

Actually, I broke my right index finger many years ago with gigs to play, and I got pretty good pretty fast at holding the pick with my middle, ring, and thumb (I'm a 3 fingered pick holder, when I use them). Just a thought.

With daws it seems very important to get the right motherboard. This is where Chris Ludwigs advice is so invaluable.

Chris has taken years off my life. hehe Of course, beyond motherboards there is a jungle of other problems but for me that was the biggie.
