My friend's salivating over it already as one-stop-shopping for simultaneously doing live sound + recording - 16 mic pres, FW interface, 2 global DSPs, every channel has its own/dynamics/gate/4 band EQ/HPF, six auxes... I'm interested to see how much it costs. He's currently using one of the Phonic Helix boards for that, but this looks like a step up.

There _is_ a difference, but it's small enough that it's hard to put into words. And I'm usually pretty good with words. The one DeeJ sold me is a touch brighter, and a touch more present. It's almost a spacial thing, the DeeJ mic sounds closer, more intimate. I used the one you sold me as a mono
