The author promised me a new upgrade for Faderworks tailored to us =
Paris users

!!!

This the page where you put all your plugins names and known latencies =
so
every time you put a plugin on your audio track you just push the om =

button

and all other Paris audio tracks get alligned !!

What else could we ask from a third party plugin developer ??

He first made a PDC for us when I kindly asked him so and then he =
makes this

update to make it even better for all of us Paris users (am I alone =
??)

For all thos that have not bought Faderworks please do so to show our =
gratitude

because he will make our work with Paris so much easier !

DeeJ come on back we are waiting for you, jump on Paris again !

Regards,

Dimitrios
