---=_linux46ec21ae--Ok, so I decided to fire up Paris 3.0 on my older XP machine. I got the hardware installed again and now when I launch the app it just says "Error initializing Paris engine... error 38/26"

I don't know what this message is...

I have three Paris EDS cards and they all say the same thing.
I have

a MEC Pro, 2 442s and 2 IF2s they all say the same thing.

I am clueless here.

The same hardware works on my 98SE machine just fine.

Any ideas?

Thanks! This is a multi-part message in MIME format.

Has anyone suggested that your computer might be too *fast* for Paris =
under XP?

Remembering that Paris was designed for Win95 and that era of hardware, =
I've found that XP installs work best if the machine is not much faster =
than the 2.4-ish ghz speeds. Faster than that has resulted in some =
werid juju regarding card positioning etc, and often Paris software =
doesn't "catch" all / any of the Paris hardware.

Just my 0.02...

-----=_NextPart_000_002A_01C7F79A.867AAF80--Hi Dimitrios,

Thanks so much for your encouragement. It means a lot. :)

My plan was to try to add a meter to no limit because I always wished it had one, and I thought it was a manageable first project. It actually only took me 2 nights with a friend just learning to read the c++, and then about 10 hours of figuring out how things worked through trial and error. I was so pumped when it finally ran!

way out of my league.

can be modified in the dsp code or not. That one is already on my to do list.

All the best,

Mike

ng.

I think it's Windows... grr.

If it was a clean install it might work. I am just not willing to start over on this machine. It would take too much time. The best thing for me to do I think is just copy all the paris projects off this machine and put them on CD's or something for my 98SE machine that is running Paris just fine. It would have been nice to have Paris on this machine but I only wanted it on here to listen to some of my old projects that are lurking on it.

Oh well...

Thanks for the advice. I appreciate all the suggestions.

Trevor

Sandy,
I'm using a Magma so the irq's haven't been a problem with 5 cards.
I was stable for years until adding a Mec with WC. Even a cloned
C drive didn't work after the extra mec was introduced then removed.

How many EDS cards, mecs, e

>Apple users are so predictable. They act like a retarded cult. If you don't
join the cult you are not cool or hip or you MUST be converted. Apple users
need to get a life. Hey, the iPOD is a great device but I still didn't buy
one because by the time I get portable music in my car and my wifes it's
gonna be around \$600 plus the other accessories I'd like it to have and I'm
at a grand so it's just not worth it to me. Eventually I'll probably just
go with a new radio that takes a USB stick.

I just gave an iMac away this week cuz it is so slow it wasn't worth using

for me. Some kid will love it though.

Apple users need to get another hobby and learn that this is just a computer and not a religion. This means you James.

It must be nice to have all that money to blow on Apple's overpriced stuff. I think he's in here:

<http://www.kabcomputers.com/images/messywire01.jpg> Just got 'em loaded up onto my ProTools rig yesterday. Love the GUI on everything. So far enjoying the limiter compressor, and the spacer very much :-D.

Thanks for the heads up, LaMont,

CLMartin,

The operating system is the "soul" of the computer,,if I could run OSX on a PC I would in a heart beat. In fact I wish Apple would drop there prices on computers and offer a version of OSX that will run legally on any PC. Of course that version would be 3 times that of the one that runs on Apple hardware. As Thad pointed out Apple holds 3% of the market and LaMont sees the Apple store packed! and you like the OS alot BTW This move would or could have Apple dominating the Market.

Ya what do I know,I like Mac OSX.

respect

Nappy

Just a heads up - if anyone needs passes to AES , I am
getting these together for the PARIS community. One
of our Key sponsors is SE Mics courtesy of Bob Reardon.
Please email me if you would like to attend.
morganp@ntplx.net

We are also running a special for AES with SE Mics Exhibit stock
check this out !

Gemini \$ 795
Titan \$ 499
SE2a \$ 249
SE3a \$ 169
SE1a stereo pair \$ 249
R1 ribbon \$ 685 (The ultimate guitar mic now used by Santana !)
Se2200a \$ 195
Reflexion filter - \$ 245

* Any SE owners feel free to chime in about your experience with theses mics
:)

>It's easy to generalize. I don't have an iPod either. I don't worship any computer company. I see faults with all of them. But I do use a dual G5 Mac in the studio. It has paid for itself many times over. (Deej has probably bought 50 computers since I bought this Mac - heh).

I've also used at least half a dozen boxes with half a dozen different operating systems over the years, still have a few of those laying around, and OSX is much, much better than all of them except BeOS.

But despite your perception of "Apple users" I don't want to convert you. Please buy whatever you want. I'd rather see market choices grow than shrink.

I expect to move to Linux eventually. But in the mean time the Mac is a workhorse and keeps getting better (this week with Logic 8). It continues to earn its place in the studio.

Cheers,

-Jamie

Did you know? Thanks to modern technology, you can use computers to
make music! It's true! We've got all the latest music software from

no shit sherlock.

A few Paris folks have been asking about Logic specials
Here you go :)

Logic Studio \$445
Logic Studio Upgrade from Logic Pro 6&7 or Logic Plat/Gold 5&6 \$175
Logic Studio Upgrade from Logic Express 6&7 or Big Box \$265
Logic Express 8 \$175
Logic Express 8 Upgrade from Logic Express 6&7 \$85

<http://store.apple.com/1-800-MY-APPLE/WebObjects/AppleStore.woa/wa/RSLID?mco=1EDEB31F&nplm=MA800LL/A>

A few important tidbits to know about Logic Studio.
- Logic Pro 8 now works with TDM/DAE on Intel-based Macs.
- There is no more dongle, but you will need your old dongle (and in working order) in order to activate an upgrade to Logic Studio.
- Logic Studio includes Soundtrack Pro, Compressor (w/ AC3 Surround

Encoding), and Quicktime Pro

- It comes w/ 5 full Jam Pack libraries, including Symphony Orchestra, Remix Tools and World Music
- You can now play, submix, route that submix to a new audio track and record back into Logic (realtime) all in the box.
- It is a bazillion percent easier to learn and use than before. Made for musicians!!!

No, these preamps were designed specifically for the bottom-mic'ing of snare drums, and the back of guitar amp cabs - didn't you know that? :)

NeilCheck for internal polarity jumpers. If this was purchased second hand, someone may have inverted the polarity.

David.

misconceptions being posted about apples market
share:

1. Apples Q2 2007 US Market share for NOTEBOOKS was 17.6 percent, placing
them third behind dell and HP.

2. Apples overall market share of the US market as of Q2 2007 was/is %5.9.
To put this in perspective, dell, the market share leader is @ 16%. I believe

this puts apple as the overall number 5 PC maker in the US

3. Apple owns the personal audio player space, they have devastated all potential rivals.

4. Apple dominates the online retail music market in real numbers, not to mention *mindshare*

5. Apple moved 1,000,000 iPhones domestically since launch, a feat that took the iPod 2 years to accomplish.

6. Margins on all apple consumer goods, computers and accessories are insanely high. Analysts estimate that the typical gross margin the typical ipod are approximately 40%. Dells box margin hovers between 3-5% on the box.

7. Apple derives revenue from the hardware and software. Think about it, there's no 800 lb gorilla waiting in the wings to collect OS licensing that is potentially more expensive than the computer itself. They have an aggressive upgrade schedule, with features people actually want and are willing to pay for.

Chuck"Jamie K" <Meta@Dimensional.com> wrote in message news:46f139c6\$1@linux...

I thought you already were using OS-x (ducking.... :>)

AAChuck,

As you know, I consider Apple and Microsoft to be essentially the same thing, giant corporations who expect _me_ to pay _them_ to restrict my freedom. I was only commenting on the 'Apple is dominating' rhetoric. You correctly point out in the music player market and the buy online music market they do. Outside of those markets they are and probably always will be niche players. Maybe phones but Nokia might have a few things to say about that as well.

Think Debian.

troller that's cheaper than 10K(O2R96) and the 17K(DM2000).
Say 4-5k DAW controller for Cubase4.

However, I think the Nuendo Folks need something along the lines of the Euphonix
MC-5. Yamaha can do it.

ick. ;oD

Seriously, I am bummed out for you. there's norhting worse than =
having to deal with this kinda' stuff, IMO. You have my permission to =
use the MEC for target practice if that will help.

;o(

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:46f472e2@linux...

Interested people,

I know 3 fried mecs is unlikely. It's not confirmed until Tuesday =

when I'll check the two that might 'still work'. The hardware =
solution

is seeming to be the most logical at this point. Here's why:

I was working perfectly with 2 mecs loaded to the gills and a 442.
I wanted one more mec and bought one from Deej. Mistakenly,
I installed it without hiding my default project. Paris freaked
and I went through days of turmoil looking to get back to where
I was. Paris refused to boot with mecs and no 442 at that time.

Next I built another comp to test eds and cables and the 442. =20
Everything went fine. No probs. This seemed promising.

Some think it's perfect as is. You know the whole digital audio testing and

null testing.

I can hear the difference using the same audio i/o unit fader nulled, 2 track
stereo btw Nuendo and Pro Tools M-powered. But, that's just me.

Pro Tools has a nice top end, where as Nuendo has a very nice round smooth
low mid with a very smooth top end..

jokes with "the preachers of the Macchurchs";-)
By the way, do you get the norwegian article about Mac in Norway
translated?

I believe Mobilephones makers are hating Norway these days. They lost
a lawsuit here this week at the highest level. So now we got 5 years
complaint/guarantee on mobile phones here in Norway, where Mac
directly have showed that the life of their mobile phone is just 1
year with their own guarantee;-)
So, for me, it shows up that most of the sellings isn't about quality
at all, it's about how much money sellers can get out of the dumb
customers;-)

with 2 mecs loaded to the gills and a 442.

I wanted one more mec and bought one from DeeJ. Mistakenly,
I installed it without hiding my default project. Paris freaked
and I went through days of turmoil looking to get back to where
I was. Paris refused to boot with mecs and no 442 at that time.

Next I built another comp to test eds and cables and the 442. =20
Everything went fine. No probs. This seemed promising.

Next I tried again in the studio with both computers and never got a=20
good Paris boot. Every time it wouldn't boot there was a Mec =
attached.

Even the 442 boots were flakey (no patchbay connections). I didn't =
learn=20
anything from this effort.

2 days ago I went to a techs place with the Paris comp, DeeJ's mec
and the 442. We used the mec throughout all testing until the end.
Fresh C drive, fresh Paris install.
As soon as the 442 was introduced Paris booted. Likely the DeeJ
mec is faulty but not necessarily.

Today I went back to my original C drive (no default proj) and Paris would not boot with my other Mec that is loaded to the gills. I = deleted the Scherzo drivers, reloaded the new ones I just got, uninstalled the subsystem and reloaded it. Once I changed to the 442 the system was = fine.

Let me rephrase "Paris would not boot" . . . Actually it would = usually start up but no audio was available in the patchbay except with the 442.

My take is that the introduction of DJ's mec (whether it worked or = didn't, let's assume that it worked) was screwy probably by my own doing. I removed it and later shorted a SCSI 2 cable at the Master Mec sometime = during that next wee

k. There was smoke in the power supply area so I never tried = that Mec again. My other mec was attached at that time. I now think it = fried something in their too.

I am trying DJs and my hopefully unfried mec at another studio on = Tuesday to confirm that neither works. If I'm wrong then we're back to software.
