Yup, I do think there will be timing problems.. Paris is 1.5 mS in to out, including conversion. You'll be looking at I'd think at least 1/2 of that, plus whatever delay is introduced in the A to D process. Gotta say, I think you'll be in phase hell trying this. It can be corrected after the fact, but playing live will have issues unless you delay using real time plugs on the other drums tracks in Steiny. Sounds like a giant headache to me dude.

>>1.5ms ain't much - at worst, it might flange a bit with the
toms coming through the overheads if we're monitoring both
signals... I know if I were trying to play anything that was
completely delayed by that much it would throw me off, but
again we're talking about being able to hear the toms in the
cans via the OH's anyway. Delaying all the singals to match
would be a deal-breaker - no one can play like that.

I think I'm gonna give it a shot - I picked up an 8-pre today
at Guitar Center. Get this, though - I was asking the guy a
couple things about it & he didn't know the answers, so I asked
him if he wouldn't mind if we cracked open the manual & he
said "as long as my boss doesn't see us break the seal & open
it up - he wouldn't be happy with that". I told him: "Look, we
can do this one of two ways, we can open it now, or I can take
it home, discover it's not going to work, then bring it back
for a refund - either way the seal's gonna get broken" lol

Dorks.

>Wait a minute... 1.5 milliseconds is a little less than the
amount of time it takes a tom hit to reach the overheads.

This may work out better than I thought. Hi,
I think 1.5 ms is a round trip analog in analog out, in your case Neil it
is halfway so it is half 1.5ms plus some samples)around 7-8 samples the
most for the Paris adat transfer.
Also around 20 samples for the ad conversion to adat.
So you will be around 1 ms I guess...
If I were you I would not hesitate letting the drummer hear the toms in his
cans , he can hear loud OH where tom also appear.
Drummers like to hear kick and snare the most.

Regards,
Dimitrios

If you are using Paris as the effects processors and Cubase as the main program then you don't need to work about the delay. Use the external effects plug-in in Cubase for any tracks you want to process thru Paris.

(859) 635-5762Dang, why ARE French women so beautiful and french men so ugly?

How's that work?

<http://www.planetoxygene.com/anne.jpg>

Anne can kick my butt anytime...

heh

DC

seriously though, the damn mainstream media never tells us about the pro-america Euros. They just get real quiet and hope we don't notice. Guess who elected this guy?

Good for France. Now we see if he can fix anything.

Whaddya have a search engine portal permanently set to the
term "global warming" or something?

David,
Looks like the Senn I'm using. It's a trouper and sounds good too.
I think I paid \$400 back a few years.

Segolene Royal? Love the name. When I first saw it I was a bit confused as it sounded like an advertizement for Shell describing one of the mandatory fuel additives that are required in gasoline in California.

;o)Hmmm.....after Googling Sarkozy for a while, it looks like France has elected Rudy Guliani. Can they do that?

;o)

reviewed the Motif when it first came out. Rarely has such a powerful and
fantastic sounding instrument been so brutally neutered by its interface
designers. And the manuals, I really, honestly wonder if they were translated
from Japanese into Hungarian, then Hungarian to French, and then into English
by a mildly retarded 10 year old.

Good luck, you'll like your soft synths even more after using your Motif
for a while.

<http://www.businessandmedia.org/articles/2007/20070506180903.aspx>

then this:

<http://www.amazon.com/Rainbow-Six-Tom-Clancy/dp/0425170349>

And you shall understand...

DCBought the kit a few weeks ago.

Soldering and diagnostic chops pretty good.

Any pitfalls?? I've pulled this beast apart before to add additional weighting to the keys.

I guess radio silence is to be expected, but stranger things have happened.

Anyone??

Kim WGaullism wasn't inherently anti-American, it was independently pro-French.

Often Americans read any lack of rabid pro American sentiment as anti-Americanism.

France lost final faith in its purported allies during the Suez conflict

when the English decided they were finished fighting and went home without even telling the French.

What will be interesting is if Sarkozy can really do the things he says he wants to do. The biggest challenge will be reforming agricultural subsidies. All those picture perfect wineries and dairy farms you see in the tour guides? A handful would be going concerns without subsidies of between 40 and 75 percent of income. Personally I don't think it can be done without actual revolt--the French consider mildly organized violence a legitimate form of political expression. But we shall see, and it will be interesting to watch.
