n is whether or

not the low level info that lives in the least significant 4 bits is noticably to anyone besides newborn children and dogs (none of whom would probably care!).

>James--
yeah, the thing seems to whine a bit at times,
but it was always quieter than the HD that came with the mac--
i took off the jumper (j50), which was supposed to allow the Maxotr
to turn into a slave, and then the Maxtor didn't show up
at all!! not even in the system profiler.

i regret that i don't understand this stuff more.
but thanks to you--
jp
